

ISO 11345:2006-02 (E)

Rubber - Assessment of carbon black and carbon black/silica dispersion - Rapid comparative methods

| Contents | | Page |
|--|--|-------------|
| Foreword | | iv |
| Introduction | | v |
| 1 | Scope | 1 |
| 2 | Normative references | 1 |
| 3 | Terms and definitions | 1 |
| 4 | Principle | 1 |
| 5 | Number of tests | 2 |
| 6 | Method A -- Visual microscopic or photographic microscopic inspection with × 30 magnification | 2 |
| 7 | Method B -- Split-field microscopic inspection with × 30 magnification | 3 |
| 8 | Method C -- Visual microscopic or photographic microscopic inspection with × 100 magnification | 6 |
| 9 | Method D -- Split-field microscopic inspection with × 100 magnification | 7 |
| 10 | Method E -- Large-agglomerate count with × 100 magnification | 8 |
| 11 | Test report | 10 |
| Annex A (normative) Visual dispersion rating vs dispersion classification at × 30 magnification (methods A and B) | | 11 |
| Annex B (normative) Visual dispersion rating vs dispersion classification at × 100 magnification -- Carbon black (CB) | | 12 |
| Annex C (normative) Visual dispersion rating vs dispersion classification at × 100 magnification -- Reinforcing carbon black (RCB) | | 15 |
| Annex D (informative) Visual dispersion rating vs dispersion classification at × 100 magnification - Reinforcing carbon black with silica (RCB/Silica) | | 18 |
| Annex E (normative) Visual dispersion rating vs dispersion classification at × 100 magnification -- Semi-reinforcing carbon black (SRCB) | | 21 |
| Annex F (informative) Dispersion in rubber | | 24 |
| Bibliography | | 26 |
