

DIN EN ISO 22825:2006-10 (E)

Non-destructive testing of welds - Ultrasonic testing - Testing of welds in austenitic steels and nickel-based alloys (ISO 22825:2006)

Contents		Page
Foreword		2
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	6
4	Information required prior to testing	6
4.1	Items to be defined by specification	6
4.2	Specific information required by the operator prior to testing	6
5	Personnel	6
6	Equipment	7
7	Range and sensitivity setting	7
7.1	Range setting	7
7.2	Sensitivity setting	7
7.3	Transfer correction	8
8	Written testing procedure	9
9	Reference blocks	9
10	Surface condition	10
11	Parent metal testing	10
12	Testing of weld	10
12.1	General	10
12.2	Indication sizing	11
12.3	Evaluation of indications	11
13	Test report	11
13.1	General data	11
13.2	Information related to equipment	12
13.3	Information related to testing technique	12
13.4	Results of the testing	13
Annex A (informative) Development of a written procedure		14
Annex B (informative) Typical design of reference blocks		16
Bibliography		18
