Foreword 3

1 Scope 4

2 Normative references 4

3 Symbols and their meanings 5

4 General inspection of the testing machine 5

5 Verification of the force applied by the testing machine 6
5.1 General 6
5.2 Masses 6
5.3 Determination of the discrimination threshold 6
5.4 Determination of the lower limit of verification 7
5.5 Test procedure 7
5.6 Assessment of the force applied by the machine 9

6 Class of the testing machine 9
6.1 General 9
6.2 Lever-type creep testing machines 9
6.3 Creep testing machines with the force applied by direct acting masses 10
6.4 Creep testing machines with the force applied directly by a spring 10

7 Verification report 11

8 Intervals between verifications 11

Annex A (normative) General inspection of the testing machine 12
