ISO 19003 :2006-10 (E)

Rubber and rubber products_- Guidance on the application of statistics to physical testing

Contents

Page

Foreword ... vi

Introduction ... vii

1 Scope ... 1

2 References ... 1

3 Terms and definitions ... 1

4 Symbols ... 4

5 Limitations of test results ... 5
5.1 Variability ... 5
5.2 Accuracy, trueness and precision ... 6
5.3 Relevance and significance ... 7

6 Distribution of results and measures of central tendency ... 7
6.1 Principles ... 7
6.2 Methodology ... 8
6.2.1 Types of distribution ... 8
6.2.2 Measures of central tendency ... 12
6.2.3 Measures of dispersion ... 15
6.2.4 Transformation to normal distribution ... 16
6.2.5 Test of departure from normality ... 17
6.3 Applications to rubber testing ... 20
6.3.1 General ... 20
6.3.2 Tensile testing ... 20
6.3.3 Fatigue ... 21
6.3.4 Conversion to normal distribution ... 24
6.3.5 Other uses of the median ... 25

7 Confidence limits and significant difference ... 26
7.1 Principles ... 26
7.2 Methodology ... 26
7.2.1 Confidence limits and confidence intervals ... 26
7.2.2 Significant difference ... 31
7.3 Applications to rubber testing ... 35
7.3.1 General ... 35
7.3.2 Confidence limits and specification limits ... 35
7.3.3 Comparison of results ... 36

8 Ranking methods ... 37
8.1 Principles ... 37
8.2 Methodology ... 37
8.2.1 Friedman's test ... 37
8.2.2 The outside count test ... 39
8.3 Applications to rubber testing ... 39

9 Criteria for rejecting outliers ... 40
9.1 Principles ... 40
9.2 Methodology ... 41
9.2.1 General ... 41
9.2.2 Dixon's test ... 41
9.2.3 Cochran's test for variance ... 43
9.3 Applications to rubber testing ... 45
9.3.1 General ... 45

9.3.2 Dixon's test applied to individual results 45
9.3.3 Cochran's variance test 46
9.3.4 Dixon's test applied to a group of mean values 47

10 Analysis of variance (ANOVA) 47
10.1 Principles 47
10.2 Methodology 48
10.2.1 General 48
10.2.2 One factor with an equal number of replicates 48
10.2.3 One factor with a variable number of replicates 49
10.2.4 Two (and over) factor analysis of variance 50
10.3 Applications to rubber testing 50

11 Regression analysis 54
11.1 Principles 54
11.2 Methodology 55
11.2.1 General 55
11.2.2 Linear least squares 55
11.2.3 Quadratic least squares 56
11.2.4 Cubic least squares 56
11.3 Applications to rubber testing 56
11.3.1 General 56
11.3.2 The effect of temperature on compression set 56
11.3.3 Effect of ageing on tensile strength 58
11.3.4 Temperature of retraction test 59

12 Uncertainty of measurement 60
12.1 Principles 60
12.2 Methodology 61
12.2.1 Compilation of a single value for uncertainty 61
12.2.2 Random uncertainty (U_r) 61
12.2.3 Systematic uncertainty (U_s) 62
12.2.4 Deviation of a single value of total uncertainty 63
12.2.5 Reporting of results 63
12.3 Applications to rubber testing 63

13 Sampling 64
13.1 Principles 64
13.2 Methodology 65
13.2.1 General 65
13.2.2 Acceptable quality level and limiting quality 65
13.2.3 Assessment of nonconformity 65
13.2.4 Inspection levels 66
13.2.5 Plans for sampling by attributes 66
13.2.6 Random sampling 67
13.3 Applications to rubber testing 68

14 Number of test pieces 68
14.1 Principles 68
14.2 Methodology 69
14.3 Applications to rubber testing 69
14.3.1 General 69
14.3.2 Refinement of confidence limits 69
14.3.3 Refinement of a pass/fail status 70

15 Expression of results 70
15.1 Principles 70
15.2 Methodology 70
15.2.1 The test report 70
15.2.2 Rounding 72
15.3 Applications to rubber testing 73
15.3.1 General 73
15.3.2 Construction of a histogram 73

15.3.3 Examples of rounding 74

16 Precision statements 74
16.1 General 74
16.2 Principles 74
16.3 Methodology 75
16.4 Applications to rubber testing 77

17 Design of experiments 78
17.1 General information and principles 78
17.1.1 General information 78
17.1.2 Principles 79
17.2 Methodology 92
17.2.1 General 92
17.2.2 Descriptive experiments 92
17.2.3 Comparative experiments 93
17.2.4 Response experiments 95
17.3 Applications to rubber testing 95
17.3.1 Descriptive experiments 95
17.3.2 Comparative experiments 97
17.3.3 Response experiments 101

18 Statistical quality control 105
18.1 Principles 105
18.2 Methodology 106
18.2.1 General 106
18.2.2 Control charts by attributes 106
18.2.3 Control charts by variables 106
18.3 Applications to rubber testing 108
18.3.1 General 108
18.3.2 Control charts 108
18.3.3 Cusum chart 111

Annex A (informative) **Mathematical form of the distribution functions referenced in this International Standard** 115

Annex B (informative) **Additional forms of mean value** 117

Annex C (informative) **Inter-relationships for measures of central tendency in the double exponential and Weibull distributions** 118

Annex D (informative) **Equation for the calculation of standard deviation** 119

Annex E (informative) **Construction of Weibull probability paper** 121

Annex F (informative) **Equations for the calculation of Student's t-values** 122

Annex G (informative) **Analysis of variance** 123

Annex H (informative) **Equations for the calculation of regression coefficients** 127

Annex I (informative) **The intercal method** 129
