## Rubber and rubber products\_ - Guidance on the application of statistics to physical testing

---

### Contents

Page

Foreword.....	vi
Introduction .....	vii
1 Scope .....	1
2 References.....	1
3 Terms and definitions.....	1
4 Symbols .....	4
5 Limitations of test results .....	5
5.1 Variability.....	5
5.2 Accuracy, trueness and precision .....	6
5.3 Relevance and significance.....	7
6 Distribution of results and measures of central tendency .....	7
6.1 Principles.....	7
6.2 Methodology.....	8
6.2.1 Types of distribution .....	8
6.2.2 Measures of central tendency .....	12
6.2.3 Measures of dispersion.....	15
6.2.4 Transformation to normal distribution .....	16
6.2.5 Test of departure from normality .....	17
6.3 Applications to rubber testing.....	20
6.3.1 General.....	20
6.3.2 Tensile testing.....	20
6.3.3 Fatigue .....	21
6.3.4 Conversion to normal distribution.....	24
6.3.5 Other uses of the median.....	25
7 Confidence limits and significant difference .....	26
7.1 Principles.....	26
7.2 Methodology.....	26
7.2.1 Confidence limits and confidence intervals .....	26
7.2.2 Significant difference .....	31
7.3 Applications to rubber testing.....	35
7.3.1 General.....	35
7.3.2 Confidence limits and specification limits.....	35
7.3.3 Comparison of results.....	36
8 Ranking methods.....	37
8.1 Principles.....	37
8.2 Methodology.....	37
8.2.1 Friedman's test .....	37
8.2.2 The outside count test.....	39
8.3 Applications to rubber testing.....	39
9 Criteria for rejecting outliers .....	40
9.1 Principles.....	40
9.2 Methodology.....	41
9.2.1 General.....	41
9.2.2 Dixon's test.....	41
9.2.3 Cochran's test for variance .....	43
9.3 Applications to rubber testing.....	45
9.3.1 General.....	45

9.3.2	Dixon's test applied to individual results .....	45
9.3.3	Cochran's variance test.....	46
9.3.4	Dixon's test applied to a group of mean values .....	47
10	Analysis of variance (ANOVA) .....	47
10.1	Principles .....	47
10.2	Methodology.....	48
10.2.1	General .....	48
10.2.2	One factor with an equal number of replicates.....	48
10.2.3	One factor with a variable number of replicates.....	49
10.2.4	Two (and over) factor analysis of variance .....	50
10.3	Applications to rubber testing .....	50
11	Regression analysis .....	54
11.1	Principles .....	54
11.2	Methodology.....	55
11.2.1	General .....	55
11.2.2	Linear least squares .....	55
11.2.3	Quadratic least squares .....	56
11.2.4	Cubic least squares .....	56
11.3	Applications to rubber testing .....	56
11.3.1	General .....	56
11.3.2	The effect of temperature on compression set.....	56
11.3.3	Effect of ageing on tensile strength .....	58
11.3.4	Temperature of retraction test.....	59
12	Uncertainty of measurement.....	60
12.1	Principles .....	60
12.2	Methodology.....	61
12.2.1	Compilation of a single value for uncertainty .....	61
12.2.2	Random uncertainty ( $U_r$ ) .....	61
12.2.3	Systematic uncertainty ( $U_s$ ) .....	62
12.2.4	Deviation of a single value of total uncertainty .....	63
12.2.5	Reporting of results .....	63
12.3	Applications to rubber testing .....	63
13	Sampling .....	64
13.1	Principles .....	64
13.2	Methodology.....	65
13.2.1	General .....	65
13.2.2	Acceptable quality level and limiting quality .....	65
13.2.3	Assessment of nonconformity .....	65
13.2.4	Inspection levels .....	66
13.2.5	Plans for sampling by attributes .....	66
13.2.6	Random sampling .....	67
13.3	Applications to rubber testing .....	68
14	Number of test pieces.....	68
14.1	Principles .....	68
14.2	Methodology.....	69
14.3	Applications to rubber testing .....	69
14.3.1	General .....	69
14.3.2	Refinement of confidence limits.....	69
14.3.3	Refinement of a pass/fail status .....	70
15	Expression of results.....	70
15.1	Principles .....	70
15.2	Methodology.....	70
15.2.1	The test report .....	70
15.2.2	Rounding.....	72
15.3	Applications to rubber testing .....	73
15.3.1	General .....	73
15.3.2	Construction of a histogram .....	73

15.3.3	Examples of rounding .....	74
16	Precision statements .....	74
16.1	General .....	74
16.2	Principles .....	74
16.3	Methodology .....	75
16.4	Applications to rubber testing .....	77
17	Design of experiments .....	78
17.1	General information and principles .....	78
17.1.1	General information .....	78
17.1.2	Principles .....	79
17.2	Methodology .....	92
17.2.1	General .....	92
17.2.2	Descriptive experiments .....	92
17.2.3	Comparative experiments .....	93
17.2.4	Response experiments .....	95
17.3	Applications to rubber testing .....	95
17.3.1	Descriptive experiments .....	95
17.3.2	Comparative experiments .....	97
17.3.3	Response experiments .....	101
18	Statistical quality control .....	105
18.1	Principles .....	105
18.2	Methodology .....	106
18.2.1	General .....	106
18.2.2	Control charts by attributes .....	106
18.2.3	Control charts by variables .....	106
18.3	Applications to rubber testing .....	108
18.3.1	General .....	108
18.3.2	Control charts .....	108
18.3.3	Cusum chart .....	111
Annex A	(informative) Mathematical form of the distribution functions referenced in this International Standard .....	115
Annex B	(informative) Additional forms of mean value .....	117
Annex C	(informative) Inter-relationships for measures of central tendency in the double exponential and Weibull distributions .....	118
Annex D	(informative) Equation for the calculation of standard deviation .....	119
Annex E	(informative) Construction of Weibull probability paper .....	121
Annex F	(informative) Equations for the calculation of Student's <i>t</i> -values .....	122
Annex G	(informative) Analysis of variance .....	123
Annex H	(informative) Equations for the calculation of regression coefficients .....	127
Annex I	(informative) The intercal method .....	129
Bibliography	.....	130
