ISO 15156-3:2009-10 (E)

Petroleum and natural gas industries - Materials for use in H<(Index)2>S-containing environ ments in oil and gas production - Part 3: Cracking-resistant CRAs (corrosion-resistant alloys) and other alloys

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 2

3 Terms and definitions 3

4 Symbols and abbreviated terms 5

5 Factors affecting the cracking resistance of CRAs and other alloys in H2S-containing environments 5

6 Qualification and selection of CRAs and other alloys with respect to SSC, SCC and GHSC in H2S-containing environments 6
6.1 General 6
6.2 Evaluation of materials properties 6
6.3 PREN 8

7 Purchasing information and marking 9
7.1 Information that should be supplied for material purchasing 9
7.2 Marking, labelling and documentation 9

Annex A (normative) Environmental cracking-resistant CRAs and other alloys (including Table A.1 -- Guidance on the use of the materials selection tables) 10

Annex B (normative) Qualification of CRAs for H2S-service by laboratory testing 48

Annex C (informative) Information that should be supplied for material purchasing 58

Annex D (informative) Materials chemical compositions and other information 60

Annex E (informative) Nominated sets of test conditions 72

Bibliography 73
