DIN EN ISO 21457:2010-12 (E)

Petroleum, petrochemical and natural gas industries - Materials selection and corrosion control for oil and gas production systems (ISO 21457:2010)

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms, definitions and abbreviated terms 6
3.1 Terms and definitions 6
3.2 Abbreviated terms 9

4 Design information for materials selection 10

5 Materials selection report 11

6 General guidelines for corrosion evaluations and materials selection 11
6.1 General 11
6.2 Internal corrosion in oil and gas production and processing 12
6.3 Internal corrosion in injection systems 16
6.4 Internal corrosion in utility systems 16
6.5 Sand erosion 17
6.6 External corrosion 17
6.7 Polymeric materials 19
6.8 Glass-fibre-reinforced plastic 19
6.9 Mechanical properties and material usage limitations 19

7 Materials selection for specific applications and systems 20
7.1 General 20
7.2 Oil and gas production and processing systems 21
7.3 Injection systems 23
7.4 Utility systems 24
7.5 Pipelines and flowlines 28

8 Corrosion control 29
8.1 Chemical treatment 29
8.2 Internal corrosion allowance 30
8.3 Selection of internal and external coatings 31
8.4 External splash zone protection 31
8.5 Cathodic protection 31
8.6 Corrosion protection of closed compartments 32
8.7 Connection of dissimilar materials 32
8.8 Sealing materials 33
8.9 Fasteners 33
8.10 Weld overlay 34
8.11 Preferential weld corrosion 34
8.12 Corrosion management 34

Annex A (informative) Design basis for hydrocarbon systems 35

Annex B (informative) Corrosion monitoring 37

Annex C (informative) Chemical composition of some typical oilfield alloys 38
