ISO 21457:2010-09 (E)

Petroleum, petrochemical and natural gas industries - Materials selection and corrosion control for oil and gas production systems

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms, definitions and abbreviated terms 2
3.1 Terms and definitions 2
3.2 Abbreviated terms 5

4 Design information for materials selection 6

5 Materials selection report 7

6 General guidelines for corrosion evaluations and materials selection 7
6.1 General 7
6.2 Internal corrosion in oil and gas production and processing 8
6.3 Internal corrosion in injection systems 12
6.4 Internal corrosion in utility systems 12
6.5 Sand erosion 13
6.6 External corrosion 13
6.7 Polymeric materials 15
6.8 Glass-fibre-reinforced plastic 15
6.9 Mechanical properties and material usage limitations 15

7 Materials selection for specific applications and systems 16
7.1 General 16
7.2 Oil and gas production and processing systems 17
7.3 Injection systems 19
7.4 Utility systems 20
7.5 Pipelines and flowlines 24

8 Corrosion control 25
8.1 Chemical treatment 25
8.2 Internal corrosion allowance 26
8.3 Selection of internal and external coatings 27
8.4 External splash zone protection 27
8.5 Cathodic protection 27
8.6 Corrosion protection of closed compartments 28
8.7 Connection of dissimilar materials 28
8.8 Sealing materials 29
8.9 Fasteners 29
8.10 Weld overlay 30
8.11 Preferential weld corrosion 30
8.12 Corrosion management 30

Annex A (informative) Design basis for hydrocarbon systems 31

Annex B (informative) Corrosion monitoring 33

Annex C (informative) Chemical composition of some typical oilfield alloys 34

Bibliography 38
