Foreword 5

1 Scope 6

2 Normative references 7

3 Terms, abbreviated terms, and definitions 9
3.1 Terms and definitions 9
3.2 Abbreviated terms 12

4 Manifold and template functional considerations 14
4.1 General 14
4.2 System requirements 15
4.3 System Interfaces 16
4.4 Cluster manifold requirements 17
4.4.1 General 17
4.4.2 Alignment 18
4.4.3 Guidance system 18
4.5 Template system requirements 18
4.5.1 General 18
4.5.2 Drilling and completion interface 18
4.5.3 Alignment 18
4.5.4 Guidance system 19

5 Design considerations 19
5.1 System design 19
5.1.1 Number of wells 19
5.1.2 Well spacing 19
5.1.3 Maintenance 19
5.1.4 Barrier philosophy 20
5.1.5 Safety 20
5.1.6 External corrosion protection design 21
5.1.7 Templates 21
5.2 Loads 21
5.2.1 External loads 21
5.2.2 Thermal effects 22
5.2.3 Templates 22
5.3 Piping design 23
5.3.1 General requirements 23
5.3.2 Applicable piping codes 24
5.3.3 Pigging 24
5.3.4 Erosion 24
5.3.5 Flow assurance 24
5.4 Structural design 24
5.4.1 General 24
5.4.2 Bottom frame/guide base/support structure 25
5.4.3 Protection structure 26
5.5 Foundation design 26
5.5.1 General 26
5.5.2 Requirements 27
5.5.3 Levelling 29
5.5.4 Grouting system 29
5.6 Components 29
5.6.1 General 29

Page

5.6.2 Chemical injection 30
5.6.3 Fluid characteristics 30

6 Verification and validation of design 31
6.1 Design verification 31
6.1.1 General 31
6.1.2 Design documentation 31
6.1.3 Design reviews 32
6.1.4 Factory acceptance testing 32
6.2 Design validation 33
6.2.1 General 33
6.2.2 Qualification testing 33
6.2.3 System integration testing 34
6.3 Other comments 35

7 Materials and fabrication requirements to piping systems 35
7.1 General 35
7.2 Pipe and pipe fittings 36
7.3 Forged components 37
7.4 Chemical composition and weldability 37
7.5 Test sampling of base materials 38
7.5.1 General 38
7.5.2 Test sampling of forgings and hot isostatic pressed components 38
7.6 Mechanical and corrosion testing of base materials 38
7.6.1 General 38
7.6.2 Tensile testing 38
7.6.3 Charpy V-notch impact requirements 38
7.6.4 Hardness testing 39
7.6.5 Micrographic examination 39
7.6.6 Corrosion testing 40
7.7 Non-destructive inspection of components 40
7.7.1 Seamless pipes and fittings 40
7.7.2 Welded pipes and fittings 40
7.7.3 Forgings 41
7.7.4 NDT personnel qualifications 41
7.8 Fastener materials 42
7.9 Bending and forming operations 42
7.9.1 General 42
7.9.2 Cold forming 42
7.9.3 Hot induction bending 42
7.10 Overlay welding and buttering of components 44
7.10.1 General 44
7.10.2 Corrosion-resistant overlay 45
7.10.3 Weld buttering 45
7.11 Welding and non-destructive testing of piping systems 45
7.11.1 Welding qualification requirements 45
7.11.2 Welding requirements 49
7.11.3 Inspection and non-destructive testing (NDT) of welds 52
7.11.4 Repair 54

8 Fabrication and manufacturing considerations 54
8.1 External corrosion protection 54
8.2 Colours 54
8.3 Material traceability 54

9 Installation, operation and maintenance considerations 55
9.1 Installation requirements 55
9.2 Operations requirements 55
9.3 Maintenance considerations 56
9.3.1 General 56

Page

9.3.2 Planning **56**
9.3.3 Seabed equipment maintenance **56**
9.4 Requirements during installation **57**
9.4.1 General **57**
9.4.2 Installation method and equipment **58**
9.4.3 Vessel considerations **59**
9.4.4 Hook-up and commissioning **59**
9.4.5 Detailed requirements **59**

10 ROV/ROT aspects **60**

11 Lifting considerations **61**
11.1 Pad eyes **61**
11.2 Other lifting devices **61**

12 Equipment marking **61**

13 Transportation and storage **62**
13.1 General **62**
13.2 Storage and preservation procedure **62**
13.3 Sea-fastening **62**

14 Abandonment provisions **62**
14.1 General **62**
14.2 Decommissioning **62**
14.3 Design **63**
14.4 Post-abandonment operation **63**
14.5 Structures **63**
14.6 Manifolds **63**
14.7 Templates **63**

Annex A (informative) **Typical manifold data sheet** **64**

Bibliography **66**
