DIN EN ISO 13678:2012-04 (E)

Petroleum and natural gas industries - Evaluation and testing of thread compounds for use with casing, tubing, line pipe and drill stem elements (ISO 13678:2010); English version EN ISO 13678:2012

Foreword 3

Introduction 4

1 Scope 5

2 Conformance 5
2.1 Dual citing of normative references 5
2.2 Units of measurement 5

3 Normative references 5

4 Terms and definitions 6

5 Thread compound characteristics 7
5.1 Product characteristics 7
5.2 Physical and chemical characteristics 8

6 Thread compound performance properties 12
6.1 Small-scale test 12
6.2 Frictional properties 13
6.3 Extreme surface contact pressure (gall resistance) properties for casing, tubing and line pipe 13
6.4 Fluid sealing properties for casing, tubing and line pipe 14

7 Quality assurance and control 14

8 Marking requirements 15
8.1 Marking 15
8.2 Labelling 15

Annex A (informative) **API modified thread compound** 16

Annex B (normative) **Casing, tubing and line pipe reference standard formulation** 20

Annex C (normative) **Penetration test** 22

Annex D (normative) **Evaporation test** 23

Annex E (normative) **Oil separation test** 24

Annex F (normative) **Application/adherence test** 25

Annex G (normative) **Gas evolution test** 26

Annex H (normative) **Water leaching test** 30

Annex I (informative) **Frictional properties test** 33

Annex J (informative) **Extreme surface contact pressure (galling) test for casing, tubing and line pipe** 43

Annex K (informative) **Fluid sealing test for casing, tubing and line pipe** 44

Annex L (informative) **Corrosion inhibition tests** 47

Annex M (informative) **Compound high-temperature stability test** 48
