

DIN EN ISO 13678:2012-04 (E)

Petroleum and natural gas industries - Evaluation and testing of thread compounds for use with casing, tubing, line pipe and drill stem elements (ISO 13678:2010); English version EN ISO 13678:2012

7 cblYbHg

DU Y

Foreword	3
Introduction.....	4
1 Scope	5
2 Conformance	5
2.1 Dual citing of normative references	5
2.2 Units of measurement.....	5
3 Normative references	5
4 Terms and definitions	6
5 Thread compound characteristics.....	7
5.1 Product characteristics.....	7
5.2 Physical and chemical characteristics.....	8
6 Thread compound performance properties	12
6.1 Small-scale test	12
6.2 Frictional properties.....	13
6.3 Extreme surface contact pressure (gall resistance) properties for casing, tubing and line pipe	13
6.4 Fluid sealing properties for casing, tubing and line pipe	14
7 Quality assurance and control.....	14
8 Marking requirements.....	15
8.1 Marking.....	15
8.2 Labelling.....	15
Annex A (informative) API modified thread compound	16
Annex B (normative) Casing, tubing and line pipe reference standard formulation.....	20
Annex C (normative) Penetration test	22
Annex D (normative) Evaporation test	23
Annex E (normative) Oil separation test	24
Annex F (normative) Application/adherence test.....	25
Annex G (normative) Gas evolution test	26
Annex H (normative) Water leaching test.....	30
Annex I (informative) Frictional properties test	33
Annex J (informative) Extreme surface contact pressure (galling) test for casing, tubing and line pipe	43
Annex K (informative) Fluid sealing test for casing, tubing and line pipe.....	44
Annex L (informative) Corrosion inhibition tests	47
Annex M (informative) Compound high-temperature stability test	48
Bibliography.....	49
