

DIN EN ISO 19901-7:2013-08 (E)

Petroleum and natural gas industries - Specific requirements for offshore structures - Part 7: Stationkeeping systems for floating offshore structures and mobile offshore units (ISO 19901-7:2013); English version EN ISO 19901-7:2013, only on CD-ROM

Inhalt	Seite
Foreword	7
Introduction.....	9
1 Scope	10
2 Normative references	11
3 Terms and definitions	11
4 Symbols and abbreviated terms	15
4.1 Symbols.....	15
4.2 Abbreviated terms	16
5 Overall considerations.....	17
5.1 Functional requirements.....	17
5.2 Safety requirements	17
5.3 Planning requirements.....	17
5.4 Inspection and maintenance requirements	18
5.5 Analytical tools	18
6 Design requirements.....	18
6.1 Exposure levels	18
6.1.1 General	18
6.1.2 Exposure levels for stationkeeping systems	18
6.2 Limit states.....	19
6.2.1 General	19
6.2.2 Limit states for stationkeeping systems.....	19
6.3 Defining design situations.....	19
6.4 Design situations.....	19
6.4.1 General	19
6.4.2 Design situations for ULS	20
6.4.3 Design situations for SLS.....	21
6.4.4 Design situations for FLS.....	21
6.4.5 Design situations for ALS	21
7 Actions	22
7.1 General	22
7.2 Site-specific data requirements	22
7.2.1 Data collection and analysis	22
7.2.2 Water depth.....	22
7.2.3 Soil and sea floor conditions	22
7.2.4 Wave statistics.....	22
7.2.5 Wind statistics	22
7.2.6 Current profile.....	22
7.2.7 Atmospheric icing	23
7.2.8 Marine growth.....	23
7.3 Environmental actions on mooring lines.....	23
7.3.1 General	23
7.3.2 Current-induced actions	23
7.3.3 Ice-induced actions	23
7.3.4 Vortex-induced vibrations of mooring lines	23
7.4 Indirect actions	24

7.4.1	General.....	24
7.4.2	Frequency ranges.....	24
7.4.3	Wave-induced actions.....	24
7.4.4	Wind-induced actions.....	24
7.4.5	Current-induced actions.....	25
7.4.6	Directional distribution.....	25
7.4.7	Vortex-induced motions of floating structures.....	25
8	Mooring analysis.....	25
8.1	Basic considerations.....	25
8.1.1	Introduction.....	25
8.1.2	Mooring analysis conditions.....	26
8.2	Floating structure offset.....	27
8.2.1	General.....	27
8.2.2	Mean offset.....	27
8.2.3	Extreme values of offset.....	27
8.3	Floating structure response.....	28
8.3.1	Analysis methods.....	28
8.3.2	Extreme value statistics.....	29
8.3.3	Low-frequency damping.....	29
8.3.4	Riser considerations.....	30
8.3.5	Vortex-induced motion considerations.....	30
8.4	Mooring line response.....	32
8.4.1	General.....	32
8.4.2	Quasi-static analysis.....	33
8.4.3	Dynamic analysis.....	33
8.5	Line tension.....	33
8.5.1	Mean tension.....	33
8.5.2	Extreme values of tension.....	33
8.5.3	Design checks.....	33
8.5.4	Tension for fatigue analysis.....	33
8.6	Line length and geometry constraints.....	34
8.7	Anchor forces.....	34
8.8	Typical mooring configuration analysis and assessment.....	34
8.8.1	Frequency-domain analysis for spread mooring systems.....	34
8.8.2	Frequency-domain analysis for single point mooring systems.....	34
8.8.3	Time-domain analysis.....	35
8.9	Thruster-assisted moorings.....	35
8.9.1	General.....	35
8.9.2	Analysis conditions.....	35
8.9.3	Determination of allowable thrust.....	35
8.9.4	Load sharing.....	36
8.10	Transient analysis of floating structure motions.....	36
8.10.1	General.....	36
8.10.2	Combined time and frequency-domain analyses.....	36
8.10.3	Time-domain analysis.....	37
9	Fatigue analysis.....	37
9.1	Basic considerations.....	37
9.2	Fatigue resistance.....	38
9.2.1	Wire rope, chain and connecting links.....	38
9.2.2	T-N curves.....	38
9.2.3	Tension-tension (T-T) fatigue.....	39
9.2.4	Bending-tension (B-T) and free bending fatigue.....	39
9.3	Fatigue analysis procedure.....	40
9.3.1	General.....	40
9.3.2	Cumulative fatigue damage.....	40
9.3.3	Fatigue damage assessment.....	41
10	Design criteria.....	45
10.1	Floating structure offset.....	45
10.2	Line tension limit.....	45
10.3	Grounded line length.....	45

10.4	Anchoring systems	45
10.4.1	General	45
10.4.2	Drag anchors	46
10.4.3	Anchor piles	46
10.4.4	Other anchor types.....	46
10.4.5	Chain and wire rope holding capacity.....	47
10.4.6	Mooring test load.....	47
10.5	Fatigue safety factor	48
10.6	Corrosion and wear.....	48
10.7	Clearances	48
10.7.1	Basic considerations	48
10.7.2	Mooring line crossing pipeline	49
10.7.3	Horizontal distance between installations.....	49
10.7.4	Clearance between a drag anchor and other installations	49
10.8	Supporting structures.....	49
11	Mooring hardware	49
11.1	Mooring line components.....	49
11.1.1	General	49
11.1.2	Wire rope	49
11.1.3	Chain.....	49
11.1.4	Connecting links.....	49
11.1.5	Spring buoys.....	50
11.1.6	Anchors	50
11.2	Winching equipment	50
11.3	Monitoring equipment.....	50
11.3.1	Line tension	50
11.3.2	Line payout	50
11.3.3	Floating structure position	51
11.3.4	Floating structure heading	51
12	In-service inspection, monitoring and maintenance	51
12.1	General	51
12.2	Mobile moorings.....	51
12.3	Permanent moorings.....	51
12.3.1	General	51
12.3.2	Structural integrity management system philosophies	52
13	Dynamic positioning system.....	53
13.1	Basic considerations	53
13.1.1	General	53
13.1.2	DP equipment	53
13.2	Design and analysis	54
13.2.1	Failure modes and effects analysis	54
13.2.2	DP equipment classes	54
13.3	Design, test and maintenance.....	54
13.4	Operating personnel	55
13.5	Determination of stationkeeping capability.....	55
14	Synthetic fibre rope mooring	55
14.1	Basic considerations	55
14.2	Fibre rope mooring analysis	55
14.2.1	Fibre rope tension-elongation properties	55
14.2.2	Fibre rope line length.....	56
14.3	Fatigue analysis.....	56
14.3.1	Tension-tension fatigue resistance	56
14.3.2	Axial compression fatigue.....	56
14.4	Creep analysis	56
14.5	Design criteria.....	57
14.5.1	Maximum line tension.....	57
14.5.2	Minimum line tension.....	57
14.5.3	Fatigue.....	57
14.5.4	Creep elongation	57
14.6	Model testing	57

Annex A (informative) Additional information and guidance	58
A.1 Scope	58
A.1.1 General	58
A.1.2 Spread moorings (catenary, taut-line and semi-taut-line)	58
A.1.3 Single point moorings	58
A.1.4 Dynamic positioning (DP) systems	59
A.1.5 Thruster-assisted moorings	59
A.1.6 Permanent and mobile stationkeeping systems	60
A.1.7 Mooring line components	60
A.2 Normative references	67
A.3 Terms and definitions	67
A.4 Symbols and abbreviated terms	68
A.5 Overall considerations	68
A.5.1 Functional requirements	68
A.5.2 Safety requirements	68
A.5.3 Planning requirements	70
A.5.4 Inspection and maintenance requirements	70
A.5.5 Analytical tools	70
A.6 Design requirements	70
A.6.1 Exposure levels	70
A.6.2 Limit states	70
A.6.3 Defining design situations	71
A.6.4 Design situations	71
A.7 Actions	72
A.7.1 General	72
A.7.2 Site-specific data requirements	72
A.7.3 Environmental actions on mooring lines	77
A.7.4 Indirect actions	77
A.8 Mooring analysis	84
A.8.1 Basic considerations	84
A.8.2 Floating structure offset	84
A.8.3 Floating structure response	84
A.8.4 Mooring line response	94
A.8.5 Line tension	96
A.8.6 Line length and geometry constraints	96
A.8.7 Anchor forces	96
A.8.8 Typical mooring configuration analysis and assessment	96
A.8.9 Thruster-assisted moorings	98
A.8.10 Transient analysis of floating structure motions	105
A.9 Fatigue analysis	105
A.9.1 Basic considerations	105
A.9.2 Fatigue resistance	107
A.9.3 Fatigue analysis procedure	109
A.10 Design criteria	110
A.10.1 Floating structure offset	110
A.10.2 Line tension limit	111
A.10.3 Grounded line length	111
A.10.4 Anchoring systems	112
A.10.5 Fatigue safety factor	150
A.10.6 Corrosion and wear	151
A.10.7 Clearances	151
A.10.8 Supporting structures	151
A.11 Mooring hardware	151
A.11.1 Mooring line components	151
A.11.2 Winching equipment	160
A.11.3 Monitoring equipment	161
A.12 In-service inspection, monitoring and maintenance	161
A.12.1 General	161
A.12.2 Mobile moorings	161
A.12.3 Permanent moorings	161
A.13 Dynamic positioning system	163
A.13.1 Basic considerations	163

A.13.2	Design and analysis	163
A.13.3	Design, test and maintenance.....	164
A.13.4	Operating personnel	164
A.13.5	Determination of stationkeeping capability.....	165
A.14	Synthetic fibre rope mooring	165
A.14.1	Basic considerations	165
A.14.2	Fibre rope mooring analysis	166
A.14.3	Fatigue analysis.....	167
A.14.4	Creep analysis	167
A.14.5	Design criteria.....	168
A.14.6	Model testing	169
Annex B	(informative) Regional information	170
B.1	Introduction.....	170
B.1.1	General comments to the regional information	170
B.1.2	Specific comments to the regional information	170
B.2	Offshore Norway.....	170
B.2.1	Description of region	170
B.2.2	Regulatory framework.....	170
B.2.3	Technical requirements	170
B.2.4	Technical commentary.....	173
B.2.5	Additional national requirements	174
B.3	Canada.....	174
B.3.1	General	174
B.3.2	Description of region	174
B.3.3	Regulatory framework in Canada	174
B.3.4	Technical requirements	175
B.3.5	Bibliography.....	175
B.4	Russia.....	175
B.4.1	General	175
B.4.2	Bibliography.....	175
Bibliography	176
