

ISO 35103:2017-12 (E)

Petroleum and natural gas industries - Arctic operations - Environmental monitoring

Contents	Page
Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Abbreviated terms	5
5 General requirements for environmental monitoring	6
5.1 Application of ISO management system standards	6
5.2 Objectives of environmental monitoring	6
5.3 Specification for monitoring	6
5.4 Planning a monitoring programme	7
5.4.1 Programme specification	7
5.4.2 Programme adjustment	8
5.4.3 Action on non-compliance	8
5.5 Spatial scales	8
5.5.1 General	8
5.5.2 Near-field	8
5.5.3 Far-field	8
5.5.4 Regional	8
5.5.5 Transboundary	8
5.6 Temporal scales	8
5.6.1 Design	8
5.6.2 Variation in environmental aspects	9
5.6.3 Natural fluctuations	9
5.7 Environmental aspects	9
5.7.1 Types of environmental aspects	9
5.7.2 Normal, abnormal and emergency conditions	9
5.7.3 Control aspect in response to monitoring	10
5.8 Environments and components	10
5.9 Baseline conditions	10
5.10 Parameters	10
5.10.1 Selection of parameters	10
5.10.2 Accuracy	10
5.10.3 Detection limits	11
5.10.4 Units and other specifications	11
5.10.5 Physical parameters	11
5.10.6 Chemical parameters	11
5.10.7 Biological parameters	11
5.10.8 Associated measurements	12
5.10.9 Position fixing	12
5.11 Modelling	12
5.12 Sampling	13
5.13 Analytical methods	13
5.14 Toxicity tests	13
5.15 Statistical methods	13
5.16 Costs of monitoring	13

5.17	Environmental monitoring report	13
6	Factors to be considered for Arctic offshore environments	14
6.1	Characteristics of the Arctic	14
6.2	Polar location	14
6.2.1	Remoteness	14
6.2.2	Positioning	14
6.2.3	Day/night cycle	14
6.3	Low temperatures	14
6.4	Seasonal characteristics	15
6.5	Ice environments	15
6.6	Endemic species	15
6.6.1	General	15
6.6.2	Identification	16
6.6.3	Ice flora and fauna	16
6.7	Human communities	16
6.7.1	General	16
6.7.2	Indigenous peoples	16
6.7.3	Local and traditional knowledge	16
7	Monitoring requirements for offshore oil and gas sector in the Arctic	16
7.1	General	16
7.2	Offshore life cycle phases	16
7.3	Offshore environmental monitoring programme design	17
7.3.1	Objectives of offshore environmental monitoring	17
7.3.2	General aspects of environmental monitoring programme	17
7.3.3	Offshore environmental aspect and environmental impact identification	17
7.3.4	Sampling and analysis	18
7.3.5	Reference sampling	18
7.3.6	Near-field sampling	19
7.3.7	Far-field sampling	19
7.3.8	Regional sampling	20
7.3.9	Field specific stations	20
7.3.10	Marine toxicity testing	20
7.4	Environmental monitoring programme implementation	20
7.4.1	Pre-development	20
7.4.2	Exploration	21
7.4.3	Construction and commissioning	22
7.4.4	Production phase	22
7.4.5	Decommissioning and facility removal	23
7.4.6	Site restoration	23
7.4.7	Logistics, air and sea transport and accommodation	23
7.4.8	Monitoring during emergency conditions	24
	Bibliography	25
