ISO 10855-2:2018 (E)

Offshore containers and associated lifting sets — Part 2: Design, manufacture and marking of lifting sets

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Symbols

5 Technical requirements

- 5.1 General requirements
- 5.2 Dimensions and strength of lifting sets
- 5.3 Chain slings
- 5.4 Wire rope slings
- 5.5 Shackles
- 5.6 Materials
- 5.6.1 Impact testing
- 5.6.2 Welding
- 5.6.3 Materials used in wire rope slings
- 5.6.4 Galvanizing
- 5.6.5 Material certificates

6 Certificates

- 6.1 Preparation of certificates
- 6.2 Single component certificates
- 6.3 Sling certificates

7 Marking

Annex A (normative) Determination of minimum required working load limit (WLLmin) of the lifting set

Annex B (informative) Example of identification tag for chain slings

Annex C (informative) Regulations for offshore containers

- C.1 General
- C.2 General certification requirements for offshore containers
- C.3 International requirements for freight containers
- C.4 Tank containers for dangerous goods
- C.5 Gas Cylinder Bundles
- C.6 Additional requirements for offshore service containers
- C.7 ATEX (EC Directive 2014/34/EU)
