Foreword ..... **v**

Introduction ..... **vi**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **2**

4 Symbols and abbreviated terms **8**
4.1 Symbols 8
4.2 Abbreviated terms 9

5 Fundamental requirements **9**
5.1 General 9
5.2 Structural integrity requirements 10
5.3 Functional requirements 10
5.4 Requirements for specific phases of the life of the structure 11
5.4.1 Planning 11
5.4.2 Construction and deployment 11
5.4.3 Structural integrity management 11
5.4.4 Decommissioning and removal 11
5.5 Requirements for durability and robustness 12
5.5.1 Durability, maintenance and inspection 12
5.5.2 Robustness 12

6 Basis for design/assessment **13**
6.1 General 13
6.2 Platform location and orientation 13
6.3 Physical environmental conditions 14
6.4 Geotechnical and geophysical conditions 14
6.4.1 Marine site investigations 14
6.4.2 Seabed instability 15
6.4.3 Seabed disturbance 15
6.5 Specific design/assessment requirements 16
6.5.1 Topsides structures 16
6.5.2 Deck elevation 16
6.5.3 Splash zone 17
6.5.4 Stationkeeping systems 17
6.5.5 Conductor and riser systems 17
6.5.6 Foundations and anchoring 17
6.5.7 Additional operational requirements 18

7 Development of design/assessment situations **18**
7.1 Hazards 18
7.2 Hazardous events 18
7.3 Exposure levels 19
7.3.1 General 19
7.3.2 Exposure level L1 20
7.3.3 Exposure level L2 20
7.3.4 Exposure level L3 20

7.4 Design/assessment situations 21
7.4.1 General 21
7.4.2 Operational design/assessment situations 21
7.4.3 Extreme design/assessment situations 22
7.4.4 Abnormal design/assessment situations 22
7.4.5 Accidental design/assessment situations 23
7.4.6 Short duration design/assessment situations 23
7.4.7 Serviceability design/assessment situations 24

8 Limit state verification 24
8.1 General 24
8.2 Basic variables and representative values 25
8.3 Limit states 26
8.3.1 Categories of limit states 26
8.3.2 Ultimate limit states 26
8.3.3 Abnormal/accidental limit states 27
8.3.4 Serviceability limit states 27
8.3.5 Fatigue limit states 27
8.4 Limit state verification procedure 28

9 Actions 28
9.1 Classifications of actions 28
9.2 Permanent actions and their representative values 29
9.3 Operational actions and their representative values 29
9.4 Environmental actions and their representative values 30
9.5 Accidental actions and their representative values 31
9.6 Repetitive actions 31

10 Design values and partial factors 32
10.1 Design values of actions 32
10.2 Actions acting in combination 32
10.2.1 Principal and companion actions for the same action type 32
10.2.2 Principal and accompanying actions for specific design/assessment situations 33
10.3 Design values of resistance 33
10.3.1 General 33
10.3.2 Design values of materials including soils 33
10.3.3 Design values of geometric variables 34
10.3.4 Uncertainties in analysis models 34
10.4 Partial factors for operational and extreme design/assessment situations 34
10.5 Partial factors for abnormal and accidental design/assessment situations 34
10.6 Partial factors for serviceability design/assessment situations 35
10.7 Partial factors for fatigue design/assessment verification 35
10.8 Probabilistic modelling and analysis 35

11 Models and analysis 35

12 Quality management 36
12.1 General 36
12.2 Installation inspection 36
12.3 In-service inspection, maintenance and repair 36
12.4 Records and documentation of design and construction 37
12.4.1 General 37
12.4.2 Calculations 37
12.4.3 Weight and centre of gravity reports 38
12.4.4 Drawings and specifications 38

13 Assessment of existing structures 38
13.1 General 38
13.2 Condition assessment 39
13.2.1 General 39
13.2.2 Service and operating requirements 39
13.2.3 Environmental conditions 39
13.2.4 Testing, inspection, maintenance and repair history 39

13.3 Action assessment 40
13.4 Resistance assessment 40
13.5 Component and system failure consequences 40
13.6 Mitigation 40
Annex A (informative) **Additional information and guidance** **41**
Bibliography **64**
