

DIN EN ISO 35103:2020-01 (E)

Petroleum and natural gas industries - Arctic operations - Environmental monitoring (ISO 35103:2017); English version EN ISO 35103:2019

Contents	Page
Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Abbreviated terms	5
5 General requirements for environmental monitoring	6
5.1 Application of ISO management system standards	6
5.2 Objectives of environmental monitoring	6
5.3 Specification for monitoring	6
5.4 Planning a monitoring programme	7
5.4.1 Programme specification	7
5.4.2 Programme adjustment	8
5.4.3 Action on non-compliance	8
5.5 Spatial scales	8
5.5.1 General	8
5.5.2 Near-field	8
5.5.3 Far-field	8
5.5.4 Regional	8
5.5.5 Transboundary	8
5.6 Temporal scales	8
5.6.1 Design	8
5.6.2 Variation in environmental aspects	9
5.6.3 Natural fluctuations	9
5.7 Environmental aspects	9
5.7.1 Types of environmental aspects	9
5.7.2 Normal, abnormal and emergency conditions	9
5.7.3 Control aspect in response to monitoring	10
5.8 Environments and components	10
5.9 Baseline conditions	10
5.10 Parameters	10
5.10.1 Selection of parameters	10
5.10.2 Accuracy	10
5.10.3 Detection limits	11
5.10.4 Units and other specifications	11
5.10.5 Physical parameters	11
5.10.6 Chemical parameters	11
5.10.7 Biological parameters	11
5.10.8 Associated measurements	12
5.10.9 Position fixing	12
5.11 Modelling	12
5.12 Sampling	13
5.13 Analytical methods	13
5.14 Toxicity tests	13
5.15 Statistical methods	13
5.16 Costs of monitoring	13
5.17 Environmental monitoring report	13

6	Factors to be considered for Arctic offshore environments	14
6.1	Characteristics of the Arctic.....	14
6.2	Polar location	14
6.2.1	Remoteness	14
6.2.2	Positioning.....	14
6.2.3	Day/night cycle	14
6.3	Low temperatures.....	14
6.4	Seasonal characteristics.....	15
6.5	Ice environments.....	15
6.6	Endemic species.....	15
6.6.1	General.....	15
6.6.2	Identification.....	16
6.6.3	Ice flora and fauna.....	16
6.7	Human communities.....	16
6.7.1	General.....	16
6.7.2	Indigenous peoples.....	16
6.7.3	Local and traditional knowledge.....	16
7	Monitoring requirements for offshore oil and gas sector in the Arctic	16
7.1	General.....	16
7.2	Offshore life cycle phases.....	16
7.3	Offshore environmental monitoring programme design.....	17
7.3.1	Objectives of offshore environmental monitoring.....	17
7.3.2	General aspects of environmental monitoring programme.....	17
7.3.3	Offshore environmental aspect and environmental impact identification.....	17
7.3.4	Sampling and analysis.....	18
7.3.5	Reference sampling.....	18
7.3.6	Near-field sampling.....	19
7.3.7	Far-field sampling.....	19
7.3.8	Regional sampling.....	20
7.3.9	Field specific stations.....	20
7.3.10	Marine toxicity testing.....	20
7.4	Environmental monitoring programme implementation.....	20
7.4.1	Pre-development.....	20
7.4.2	Exploration.....	21
7.4.3	Construction and commissioning.....	22
7.4.4	Production phase.....	22
7.4.5	Decommissioning and facility removal.....	23
7.4.6	Site restoration.....	23
7.4.7	Logistics, air and sea transport and accommodation.....	23
7.4.8	Monitoring during emergency conditions.....	24
	Bibliography	25
