

# DIN EN ISO 35103:2020-01 (E)

Petroleum and natural gas industries - Arctic operations - Environmental monitoring  
(ISO 35103:2017); English version EN ISO 35103:2019

---

Contents	Page
Foreword .....	v
Introduction .....	vi
1 Scope .....	1
2 Normative references .....	1
3 Terms and definitions .....	1
4 Abbreviated terms .....	5
5 General requirements for environmental monitoring .....	6
5.1 Application of ISO management system standards .....	6
5.2 Objectives of environmental monitoring .....	6
5.3 Specification for monitoring .....	6
5.4 Planning a monitoring programme .....	7
5.4.1 Programme specification .....	7
5.4.2 Programme adjustment .....	8
5.4.3 Action on non-compliance .....	8
5.5 Spatial scales .....	8
5.5.1 General .....	8
5.5.2 Near-field .....	8
5.5.3 Far-field .....	8
5.5.4 Regional .....	8
5.5.5 Transboundary .....	8
5.6 Temporal scales .....	8
5.6.1 Design .....	8
5.6.2 Variation in environmental aspects .....	9
5.6.3 Natural fluctuations .....	9
5.7 Environmental aspects .....	9
5.7.1 Types of environmental aspects .....	9
5.7.2 Normal, abnormal and emergency conditions .....	9
5.7.3 Control aspect in response to monitoring .....	10
5.8 Environments and components .....	10
5.9 Baseline conditions .....	10
5.10 Parameters .....	10
5.10.1 Selection of parameters .....	10
5.10.2 Accuracy .....	10
5.10.3 Detection limits .....	11
5.10.4 Units and other specifications .....	11
5.10.5 Physical parameters .....	11
5.10.6 Chemical parameters .....	11
5.10.7 Biological parameters .....	11
5.10.8 Associated measurements .....	12
5.10.9 Position fixing .....	12
5.11 Modelling .....	12
5.12 Sampling .....	13
5.13 Analytical methods .....	13
5.14 Toxicity tests .....	13
5.15 Statistical methods .....	13
5.16 Costs of monitoring .....	13
5.17 Environmental monitoring report .....	13

<b>6</b>	<b>Factors to be considered for Arctic offshore environments .....</b>	<b>14</b>
6.1	Characteristics of the Arctic.....	14
6.2	Polar location .....	14
6.2.1	Remoteness .....	14
6.2.2	Positioning .....	14
6.2.3	Day/night cycle .....	14
6.3	Low temperatures.....	14
6.4	Seasonal characteristics.....	15
6.5	Ice environments.....	15
6.6	Endemic species.....	15
6.6.1	General.....	15
6.6.2	Identification.....	16
6.6.3	Ice flora and fauna .....	16
6.7	Human communities.....	16
6.7.1	General.....	16
6.7.2	Indigenous peoples.....	16
6.7.3	Local and traditional knowledge .....	16
<b>7</b>	<b>Monitoring requirements for offshore oil and gas sector in the Arctic .....</b>	<b>16</b>
7.1	General .....	16
7.2	Offshore life cycle phases.....	16
7.3	Offshore environmental monitoring programme design .....	17
7.3.1	Objectives of offshore environmental monitoring.....	17
7.3.2	General aspects of environmental monitoring programme .....	17
7.3.3	Offshore environmental aspect and environmental impact identification .....	17
7.3.4	Sampling and analysis .....	18
7.3.5	Reference sampling .....	18
7.3.6	Near-field sampling .....	19
7.3.7	Far-field sampling .....	19
7.3.8	Regional sampling .....	20
7.3.9	Field specific stations .....	20
7.3.10	Marine toxicity testing .....	20
7.4	Environmental monitoring programme implementation .....	20
7.4.1	Pre-development .....	20
7.4.2	Exploration .....	21
7.4.3	Construction and commissioning .....	22
7.4.4	Production phase .....	22
7.4.5	Decommissioning and facility removal .....	23
7.4.6	Site restoration .....	23
7.4.7	Logistics, air and sea transport and accommodation .....	23
7.4.8	Monitoring during emergency conditions .....	24
	<b>Bibliography .....</b>	<b>25</b>
