

DIN EN ISO 18647:2020-01 (E)

Petroleum and natural gas industries - Modular drilling rigs for offshore fixed platforms (ISO 18647:2017); English version EN ISO 18647:2019, only on CD-ROM

Contents		Page
Foreword		vi
Introduction		vii
1 Scope		1
2 Normative references		1
3 Terms and definitions		2
4 Abbreviated terms		4
5 Overall considerations		6
5.1 General		6
5.2 Functional equipment		6
5.2.1 Hoisting system		6
5.2.2 Rotary system		6
5.2.3 Circulation and solids control systems		6
5.2.4 Power and electrical systems		6
5.2.5 Well control system		7
5.2.6 BOP handling system		7
5.2.7 Cementing system		7
5.2.8 Pipe handling system		7
5.2.9 Instrument communication system		7
5.2.10 Auxiliary system		7
5.3 Layout		7
5.3.1 General		7
5.3.2 Drilling equipment set		8
5.3.3 Drilling support module		8
5.3.4 Drilling utilities		8
5.4 Health and safety considerations		8
5.4.1 General		8
5.4.2 Escape and alarms		8
5.4.3 Hazardous areas and storage of hazardous goods		9
5.4.4 Fire and explosion protection		9
5.4.5 Safety equipment		9
5.5 Operational considerations		9
5.6 Corrosion control		9
5.7 Structural considerations		9
5.8 Removal and abandonment		10
6 Design		10
6.1 General		10
6.2 Rig rating		10
6.3 Drilling equipment set		11
6.3.1 General		11
6.3.2 Derrick/Mast		12
6.3.3 Maximum hook load		12
6.3.4 Drill floor clearance		12
6.3.5 Top drive system		12
6.3.6 Well control equipment		12
6.3.7 BOP handling system		12
6.3.8 Circulation and solids control system		13
6.4 Drilling support equipment		13
6.4.1 Power of the mud pump set		13

6.4.2	Mud tank volume.....	13
6.4.3	Generator set.....	13
6.4.4	Electrical equipment and cabling.....	14
6.4.5	Emergency power supply.....	14
6.4.6	UPS.....	14
6.4.7	Fuel tank.....	14
6.4.8	P-tanks and pipework.....	14
6.4.9	Auxiliary systems.....	15
6.4.10	Other requirements.....	15
6.5	Interfaces	16
6.5.1	Seawater.....	16
6.5.2	Fresh water.....	16
6.5.3	Fuel	16
6.5.4	Compressed air	16
6.5.5	Discharge system.....	16
6.5.6	Electrical interface.....	16
6.5.7	Instrument communication interface.....	16
6.5.8	Well control system interface.....	16
6.5.9	Safety system interface.....	17
6.5.10	Flowback system interface.....	17
7	Structural design.....	17
7.1	General.....	17
7.2	Structure simulation.....	17
7.3	Design checks.....	17
7.4	Material selection.....	17
7.5	Skid rail strength analysis.....	17
8	Construction and assembly	17
8.1	General.....	17
8.2	Planning.....	18
8.3	Equipment and materials handling.....	18
8.3.1	Arrival inspection of materials and equipment	18
8.3.2	Storage and tracking of materials and equipment.....	18
8.4	Structural steelwork fabrication.....	18
8.4.1	Cylindrical tubular members.....	18
8.4.2	Non-cylindrical sections.....	18
8.4.3	Skid rail fabrication	19
8.4.4	Tolerance for skid rail installation.....	19
8.5	Welding and inspection.....	19
8.5.1	Basic requirements.....	19
8.5.2	Visual inspection.....	20
8.5.3	Non-destructive inspection	20
8.5.4	Additional inspection requirement	21
8.6	Prefabrication and installation of the piping.....	21
8.7	Outfitting.....	21
8.7.1	Heat insulating materials.....	21
8.7.2	Penetrations.....	21
8.7.3	Fire doors	21
8.7.4	Installation of ladders and guardrails	22
8.8	Corrosion control.....	22
8.9	Installation of equipment	22
8.9.1	General.....	22
8.9.2	Hoisting equipment.....	22
8.9.3	Rotating equipment.....	22
8.9.4	Circulation and solids control equipment.....	22
8.9.5	Power and electrical equipment	24
8.9.6	Well control equipment	24
8.9.7	Pipe handling equipment	24
8.9.8	Fire and gas detection equipment	24
8.9.9	Drilling instrument communication system	25
8.9.10	Boiler and steam system	25
8.10	Weighing.....	25

9	Pre-commissioning	26
9.1	Pre-commissioning scope	26
9.2	Pre-commissioning preparation	26
9.3	Hoisting equipment	27
9.4	Rotating equipment	27
9.5	Circulation and solids control equipment	28
9.6	Power and electrical equipment	28
9.6.1	Diesel generator set	28
9.6.2	Transformer	28
9.6.3	Medium voltage switchboard, low voltage switchboard and motor control centre	29
9.6.4	UPS	29
9.6.5	Electric control system equipment	29
9.7	BOP handling equipment	29
9.8	Cementing equipment	29
9.9	Pipe handling equipment	30
9.10	Fire and gas detection system equipment	30
9.11	Instrument	30
9.11.1	Drilling instrument	30
9.11.2	P-tank instrument	30
9.12	Hydraulic system	31
9.13	Skidding equipment	31
9.14	HVAC equipment	31
10	Installation, hook up and commissioning	31
10.1	Loadout and marine transportation	31
10.2	Installation	32
10.3	Hook up	32
10.3.1	Equipment hook up	32
10.3.2	Piping system hook up	32
10.3.3	Electrical hook up	33
10.4	Commissioning	33
10.4.1	General	33
10.4.2	Preparations before commissioning	33
10.4.3	System function testing	35
10.4.4	System load testing	39
11	Quality control, quality assurance and documents	40
12	In-service inspection and integrity management	40
13	Reuse	41
Annex A (informative) Additional information and guidance		42
Annex B (informative) Guidance for load and resistance factor design/working stress design method		84
Annex C (informative) List of typical fabrication design drawings and documents		91
Annex D (informative) Typical loadout and seafastening design documents		96
Annex E (informative) Typical acceptance report for an MDR on an offshore fixed platform		97
Annex F (informative) Typical completion acceptance document and record for an MDR on an offshore fixed platform		100
Annex G (informative) Typical in-service inspection plan for an MDR on a fixed offshore platform		102
