

# ISO/TS 12835:2022-03 (E)

## Qualification of casing connections for thermal wells

---

### Contents

	Page
<b>Foreword</b>	vi
<b>Introduction</b>	vii
<b>1 Scope</b>	1
<b>2 Normative references</b>	1
<b>3 Terms and definitions</b>	1
<b>4 Abbreviated terms and symbols</b>	5
4.1 Abbreviated terms	5
4.2 Symbols	6
<b>5 Program overview</b>	7
5.1 Illustrations of selected definitions	7
5.2 Program flowchart	7
<b>6 Overview and fundamental assumptions</b>	8
6.1 General	8
6.2 Main features	8
6.2.1 Purpose	8
6.2.2 Applicability to service conditions	9
6.2.3 Rationale for development	9
6.2.4 Subject of evaluation	9
6.2.5 Application severity levels	9
6.3 Assessment philosophy and principles	10
6.3.1 Fundamental principles	10
6.3.2 Conservative evaluation procedure	11
6.3.3 Mandatory and optional tasks	11
6.3.4 Use of analysis and physical testing	12
6.3.5 Performance measures	12
6.3.6 Assessment criteria	12
6.3.7 Task outcomes — data categories	13
6.3.8 Prior evaluation data	13
6.3.9 Treatment of confidential design information	13
6.3.10 Interpretation of evaluation results	14
6.3.11 Avoiding perception of conflict of interest	14
6.4 Evaluation variables	14
6.4.1 Connection loading	14
6.4.2 Impacts of contributing variables	14
6.4.3 Pin-box interferences and tapers	16
6.4.4 Material yield strength	16
6.5 Evaluation procedure	17
6.5.1 Safety standards	17
6.5.2 Seepage assessment — random variations	17
6.5.3 Seepage rate thresholds	17
6.5.4 Seal isolation	18
6.5.5 Dope entrapment	18
6.5.6 Thermal cycle test — bake-out and hold durations	18
6.5.7 Pressure and temperature loading in thermal cycle test and analysis	19
6.5.8 Dependence of material strength on temperature	19
6.6 Scope of reporting	20
<b>7 Program roles and proprietary design information</b>	20

7.1	Program execution roles .....	20
7.2	Proprietary connection design information .....	20
<b>8</b>	<b>Conformance requirements .....</b>	<b>21</b>
8.1	Conformant evaluation program .....	21
8.2	Program non-conformances .....	21
8.3	Performance acceptance .....	22
8.4	Conformance of results from previous evaluations .....	22
8.5	Use of data from previous evaluations .....	22
8.6	Conformance to lower ASLs .....	23
<b>9</b>	<b>Application severity levels .....</b>	<b>23</b>
9.1	Thermal well load path .....	23
9.2	Temperature as controlling parameter .....	25
9.3	Specifications for application severity levels .....	26
9.4	Selection of application severity level .....	27
<b>10</b>	<b>Program blocks and tasks .....</b>	<b>27</b>
10.1	Evaluation procedure overview .....	27
10.2	Critical path tasks .....	31
<b>11</b>	<b>Program specifications .....</b>	<b>32</b>
11.1	Task overview .....	32
11.2	Identification of program roles .....	32
11.3	Identification of candidate connection .....	33
11.4	Program options .....	34
11.5	Data from prior evaluations .....	35
<b>12</b>	<b>Determination of biased test population .....</b>	<b>35</b>
12.1	Task overview .....	35
12.2	Initial material property characterization .....	36
12.2.1	Task description, definitions, methods .....	36
12.2.2	Testing conditions and scope .....	37
12.2.3	Procedure for tensile tests .....	39
12.2.4	Interpretation and processing of tensile test results .....	40
12.3	Specimen configuration analysis .....	45
12.3.1	Task description .....	45
12.3.2	Modelling and reporting requirements .....	46
12.3.3	Nominal reference case .....	47
12.3.4	Worst-case geometry configurations .....	48
12.3.5	Seal taper analysis .....	50
12.3.6	Impacts of material property variations .....	51
12.3.7	Make-up torque for sealability tests .....	54
12.3.8	Test versus production specimens .....	56
<b>13</b>	<b>Specimen procurement .....</b>	<b>56</b>
13.1	Task overview .....	56
13.2	Specimen pipe procurement .....	57
13.3	Material property verification .....	57
13.3.1	Task description .....	57
13.3.2	Specimens for tensile verification tests .....	57
13.3.3	Scope of tensile verification tests .....	58
13.3.4	Coefficient of thermal expansion verification test .....	59
13.4	Test specimen machining and gauging .....	60
13.4.1	General requirements .....	60
13.4.2	Specimen naming convention .....	60
13.4.3	Specimen length and length-reference requirements .....	61
13.4.4	Geometrical configurations .....	62
13.4.5	Mother pipe for specimens .....	62
13.4.6	Specimen machining tolerances .....	63
13.5	Markings .....	65
13.6	Specimen geometry verification .....	65
13.6.1	Gauging inspection scope .....	65
13.6.2	Inspection extent - example cases .....	66
13.6.3	Geometry inspection guidelines .....	66
13.7	Procurement and quality control of connection interfacial components .....	67

13.8	Specimen handling and storage .....	67
13.8.1	Handling recommendations.....	67
13.8.2	Treatment of damaged specimens.....	68
<b>14</b>	<b>Full-scale physical tests and supplementary analyses.....</b>	<b>68</b>
14.1	Task overview.....	68
14.2	Full-scale tests - general requirements.....	69
14.2.1	Ambient temperature at test site.....	69
14.2.2	Calibration of instrumentation.....	69
14.2.3	Disabling of secondary seals.....	70
14.2.4	Seepage measurement and rate definitions.....	70
14.2.5	Load application rates.....	72
14.2.6	Excluded connections .....	72
14.3	Galling resistance test.....	73
14.3.1	Task description.....	73
14.3.2	Rationale and objectives .....	74
14.3.3	Make-break specimens.....	74
14.3.4	Scope of galling resistance test.....	74
14.3.5	Set-up and instrumentation.....	75
14.3.6	Test procedure.....	76
14.3.7	Performance assessment.....	77
14.3.8	Reporting .....	78
14.4	Thermal cycle test.....	78
14.4.1	Task description.....	78
14.4.2	Rationale and objectives .....	78
14.4.3	Thermal cycle specimens .....	79
14.4.4	Scope of thermal cycle test.....	79
14.4.5	Mechanical strain compensations .....	82
14.4.6	Set-up and instrumentation .....	85
14.4.7	Test procedure.....	91
14.4.8	Performance assessment.....	96
14.4.9	Selection of cycled specimens for bend test and limit-strain test.....	97
14.4.10	Reporting .....	97
14.5	Bending evaluation.....	97
14.6	Limit-strain test.....	98
14.6.1	Task description.....	98
14.6.2	Rationale and objectives .....	98
14.6.3	Limit-strain specimens .....	99
14.6.4	Mandatory test description .....	99
14.6.5	Set-up and instrumentation .....	101
14.6.6	Mandatory test procedure.....	103
14.6.7	Performance assessment .....	108
14.6.8	Reporting .....	108
14.7	As-tested configuration analysis .....	108
<b>15</b>	<b>Evaluation and inspection reports.....</b>	<b>108</b>
15.1	Reporting deliverables .....	108
15.2	Reporting scope and contents .....	109
15.3	Reporting templates .....	113
<b>Annex A</b> (informative) <b>FEA modelling guidelines .....</b>	<b>114</b>	
<b>Annex B</b> (informative) <b>Derivations of formulae - Strain compensation factors .....</b>	<b>124</b>	
<b>Annex C</b> (informative) <b>Program role assignments and responsibilities .....</b>	<b>133</b>	
<b>Annex D</b> (informative) <b>Optional program selections, tasks, and procedures .....</b>	<b>140</b>	
<b>Bibliography.....</b>	<b>163</b>
