

DIN EN ISO 13628-1:2025-04 (E)

Oil and gas industries including low carbon energy - Design and operation of subsea production systems - Part 1: General requirements and recommendations (ISO 13628-1:2025); English version EN ISO 13628-1:2025

Contents		Page
Foreword		v
Introduction		vi
1 Scope		1
2 Normative references		1
3 Terms, definitions and abbreviated terms		1
3.1 Terms and definitions.....		1
3.2 Abbreviated terms.....		3
4 Subsea production system		4
4.1 General.....		4
4.2 System configuration.....		4
4.3 Overview of API 17 series documents by categories.....		5
4.3.1 System level documents.....		5
4.3.2 Subsea hardware (wellheads, trees, manifolds, structures, connectors, and pumps).....		6
4.3.3 Flowlines and risers.....		7
4.3.4 Control systems.....		7
4.3.5 Intervention systems.....		8
5 Systems engineering		8
5.1 General.....		8
5.2 Systems engineering process.....		9
5.3 Subsea system production assurance and reliability management.....		10
6 Equipment design requirements		11
6.1 Design basis.....		11
6.2 Safety.....		11
6.2.1 General.....		11
6.2.2 Safety strategy.....		12
6.2.3 Safety by design.....		12
6.3 Barrier and isolation considerations.....		12
6.3.1 Barrier philosophy.....		12
6.3.2 Barrier requirements.....		14
6.3.3 Subsea isolation philosophy.....		14
6.4 Materials.....		15
6.5 Structural analysis.....		16
6.5.1 General.....		16
6.5.2 Wellhead, tree, and C/WO riser system analysis.....		16
6.6 Pumps, piping, and valves.....		16
6.7 Dropped objects and fishing gear loads.....		17
6.8 Lifting components, padeyes, and unpressurized structural components.....		17
6.9 Colours and marking.....		17
6.10 Tolerance evaluation.....		17
6.11 Design for installation.....		18
6.12 Environmental considerations.....		18
6.13 Evaluation of subsea pressure testing limitations.....		18
6.14 Design for intervention.....		19

7	Technology management guidance	19
7.1	Technology development and qualification	19
7.2	Obsolescence management	20
8	Manufacture, assembly, testing, installation, and commissioning guidance	21
8.1	Manufacture	21
8.2	Assembly	21
8.3	Testing	21
	8.3.1 General	21
	8.3.2 Inspection and test plans	22
8.4	Transportation, preservation, and storage	22
8.5	Load-out and installation	23
8.6	Commissioning/systems completion	24
9	Operations guidance	24
9.1	Integrity management	24
	9.1.1 Condition monitoring	24
	9.1.2 Reliability data collection/reporting	25
	9.1.3 Subsea production system maintenance	25
9.2	Production management	25
10	Well intervention guidance	26
11	Decommissioning guidance	26
	Annex A (informative) Systems engineering processes	28
	Bibliography	29
