Petroleum and natural gas industries - Life-cycle costing - Part 3: Implementation guidelines

Contents	Page
1 Scope	1
2 Terms, definitions and abbreviated terms	1
3 Life-cycle costing within the asset life-cycle	3
3.1 General	3
3.2 Concept selection	3
3.3 Outline design/FEED	5
3.4 Detailed design	6
3.5 Construction, hook-up and commissioning	7
3.6 Operation and maintenance	8
3.7 Disposal	9
4 Common implementation issues	9
4.1 Summary	9
4.2 The life-cycle costing coordinator	10
4.3 Training and competence	12
4.4 Preparation of a common and consistent source of data and assumptions	12
4.5 The contract	13
4.6 Data and uncertainty/new technology	16
5 The operator perspective	16
5.1 General	16
5.2 Commitment to life-cycle costing	17
5.3 Life-cycle costing -- A focal point	18
5.4 Risk	20
5.5 The contractual framework	20
6 The contractor perspective	21
6.1 General	21
6.2 Developing and organizing a capability	22
6.3 Risk -- A contractual perspective	22
7 The vendor perspective	23
7.1 General	23
7.2 The application of life-cycle costing for the vendor	23
7.3 Profitability potential for vendors	25
7.4 Communication	26
7.5 Contracts	28
7.6 Internal competence	29
