

DIN EN ISO 13503-1:2005-09 (E)

Petroleum and natural gas industries - Completion fluids and materials - Part 1:
Measurement of viscous properties of completion fluids (ISO 13503-1:2003); English
version EN ISO 13503-1:2005

Contents		Page
Foreword		3
1 Scope		4
2 Terms and definitions		4
3 Abbreviated terms		5
4 Measurement and precision		5
5 Fluid preparation		5
6 Fluid preparation using shear-history simulation (optional)		6
6.1 General		6
6.2 Requirements for proper shear-history simulation		6
6.3 Conditions for sample delivery		6
6.4 Conditions for standard shear-history simulation		6
6.5 Operational considerations		7
7 Instrument calibration		8
8 Measurement procedures		8
8.1 General		8
8.2 Non-crosslinked fluids (see 2.6)		8
8.3 Viscoelastic fluids		13
9 Calculation procedures		14
9.1 General concepts		14
9.2 Brief review of geometry-independent rheology vs. nominal rheology		15
9.3 Limitations/problems that may produce erroneous results		16
9.4 Calculation method for concentric-cylinder viscometers		16
9.5 Bingham plastic parameters for completion fluids		19
9.6 Calculations for optional shear-history simulation		19
10 Test report		20
Bibliography		23
