Page

Foreword vi

Introduction viii

1 Scope 1

2 Normative references 2

3 Terms and definitions 2

4 Symbols and abbreviated terms 7
4.1 Symbols 7
4.2 Abbreviated terms 8

5 Overall considerations 9
5.1 Functional requirements 9
5.2 Safety requirements 9
5.3 Planning requirements 10
5.4 Inspection and maintenance requirements 10
5.5 Analytical tools 10

6 Design requirements 10
6.1 Exposure levels 10
6.2 Limit states 11
6.3 Defining design situations 11
6.4 Design situations 12

7 Actions 14
7.1 General 14
7.2 Site-specific data requirements 14
7.3 Environmental actions on mooring lines 15
7.4 Indirect actions 16
7.4.1 General 16

8 Mooring analysis 18
8.1 Basic considerations 18
8.2 Floating structure offset 19
8.3 Floating structure response 20
8.4 Mooring line response 22
8.5 Line tension 23
8.6 Line length and geometry constraints 24
8.7 Anchor forces 24
8.8 Typical mooring configuration analysis and assessment 24
8.9 Thruster-assisted moorings 25
8.10 Transient analysis of floating structure motions 26

9 Fatigue analysis 27
9.1 Basic considerations 27
9.2 Fatigue resistance 28

9.3 Fatigue analysis procedure 30

10 Design criteria 35
10.1 Floating structure offset 35
10.2 Line tension limit 35
10.3 Grounded line length 35
10.4 Anchoring systems 36
10.5 Fatigue safety factor 38
10.6 Corrosion and wear 38
10.7 Clearances 39
10.8 Supporting structures 39

11 Mooring hardware 39
11.1 Mooring line components 39
11.2 Winching equipment 40
11.3 Monitoring equipment 40

12 In-service inspection, monitoring and maintenance 41
12.1 General 41
12.2 Mobile moorings 41
12.3 Permanent moorings 41

13 Dynamic positioning system 43
13.1 Basic considerations 43
13.2 Design and analysis 44
13.3 Design, test and maintenance 45
13.4 Operating personnel 45
13.5 Determination of stationkeeping capability 45

14 Synthetic fibre rope mooring 45
14.1 Basic considerations 45
14.2 Fibre rope mooring analysis 46
14.3 Fatigue analysis 46
14.4 Creep analysis 46
14.5 Design criteria 47
14.6 Model testing 48

Annex A (informative) Additional information and guidance 49

A.1 Scope 49
A.1.1 General 49
A.1.2 Spread moorings (catenary, taut-line and semi-taut-line) 49
A.1.3 Single point moorings 50
A.1.4 Dynamic positioning (DP) systems 51
A.1.5 Thruster-assisted moorings 51
A.1.6 Permanent and mobile stationkeeping systems 51
A.1.7 Mooring line components 51
A.2 Normative references 58
A.3 Terms and definitions 59
A.4 Symbols and abbreviated terms 59
A.5 Overall considerations 59
A.5.1 Functional requirements 59
A.5.2 Safety requirements 59
A.5.3 Planning requirements 61
A.5.4 Inspection and maintenance requirements 61
A.5.5 Analytical tools 61
A.6 Design requirements 62
A.6.1 Exposure levels 62
A.6.2 Limit states 62
A.6.3 Defining design situations 62
A.6.4 Design situations 62
A.7 Actions 64

A.7.1 General 64
A.7.2 Site-specific data requirements 64
A.7.3 Environmental actions on mooring lines 65
A.7.4 Indirect actions 66
A.8 Mooring analysis 67
A.8.1 Basic considerations 67
A.8.2 Floating structure offset 67
A.8.3 Floating structure response 68
A.8.4 Mooring line response 69
A.8.5 Line tension 71
A.8.6 Line length and geometry constraints 71
A.8.7 Anchor forces 71
A.8.8 Typical mooring configuration analysis and assessment 71
A.8.9 Thruster-assisted moorings 73
A.8.10 Transient analysis of floating structure motions 80
A.9 Fatigue analysis 80
A.9.1 Basic considerations 80
A.9.2 Fatigue resistance 82
A.9.3 Fatigue analysis procedure 84
A.10 Design criteria 86
A.10.1 Floating structure offset 86
A.10.2 Line tension limit 87
A.10.3 Grounded line length 87
A.10.4 Anchoring systems 87
A.10.5 Fatigue safety factor 95
A.10.6 Corrosion and wear 95
A.10.7 Clearances 95
A.10.8 Supporting structures 95
A.11 Mooring hardware 95
A.11.1 Mooring line components 95
A.11.2 Winching equipment 98
A.11.3 Monitoring equipment 100
A.12 In-service inspection, monitoring and maintenance 100
A.12.1 General 100
A.12.2 Mobile moorings 100
A.12.3 Permanent moorings 100
A.13 Dynamic positioning system 102
A.13.1 Basic considerations 102
A.13.2 Design and analysis 102
A.13.3 Design, test and maintenance 103
A.13.4 Operating personnel 104
A.13.5 Determination of stationkeeping capability 104
A.14 Synthetic fibre rope mooring 104
A.14.1 Basic considerations 104
A.14.2 Fibre rope mooring analysis 105
A.14.3 Fatigue analysis 106
A.14.4 Creep analysis 106
A.14.5 Design criteria 108
A.14.6 Model testing 108

Annex B (informative) Regional information 109

B.1 Introduction 109
B.1.1 General comments to the regional information 109
B.1.2 Specific comments to the regional information 109
B.2 Offshore Norway 109
B.2.1 Description of region 109
B.2.2 Regulatory framework 109
B.2.3 Technical information 110
B.2.4 Technical commentary 112
B.2.5 Additional national requirements 112
Bibliography 113
