

DIN EN ISO 19901-7:2006-03 (E)

Petroleum and natural gas industries - Specific requirements for offshore structures - Part 7: Stationkeeping systems for floating offshore structures and mobile offshore units (ISO 19901-7:2005); English version EN ISO 19901-7:2005

Inhalt	Seite
Foreword	2
Introduction.....	8
1 Scope.....	9
2 Normative references.....	10
3 Terms and definitions	10
4 Symbols and abbreviated terms	15
4.1 Symbols.....	15
4.2 Abbreviated terms	16
5 Overall considerations.....	17
5.1 Functional requirements	17
5.2 Safety requirements	17
5.3 Planning requirements.....	18
5.4 Inspection and maintenance requirements	18
5.5 Analytical tools	18
6 Design requirements.....	18
6.1 Exposure levels	18
6.1.1 General	18
6.1.2 Exposure levels for stationkeeping systems	19
6.2 Limit states.....	19
6.2.1 General	19
6.2.2 Limit states for stationkeeping systems.....	19
6.3 Defining design situations	19
6.4 Design situations.....	20
6.4.1 General	20
6.4.2 Design situations for ULS	20
6.4.3 Design situations for SLS.....	22
6.4.4 Design situations for FLS.....	22
6.4.5 Design situations for ALS	22
7 Actions	22
7.1 General	22
7.2 Site-specific data requirements	22
7.2.1 Data collection and analysis	22
7.2.2 Water depth.....	23
7.2.3 Soil and sea floor conditions	23
7.2.4 Wave statistics.....	23
7.2.5 Wind statistics	23
7.2.6 Current profile.....	23
7.2.7 Atmospheric icing	23
7.2.8 Marine growth	23
7.3 Environmental actions on mooring lines.....	23
7.3.1 General	23
7.3.2 Current-induced actions	24
7.3.3 Ice-induced actions	24
7.3.4 Vortex-induced vibrations of mooring lines	24
7.4 Indirect actions	24

7.4.1	General.....	24
7.4.2	Frequency ranges.....	24
7.4.3	Wave-induced actions.....	25
7.4.4	Wind-induced actions.....	25
7.4.5	Current-induced actions.....	25
7.4.6	Directional distribution.....	25
7.4.7	Vortex-induced motions of floating structures.....	25
8	Mooring analysis.....	26
8.1	Basic considerations.....	26
8.1.1	Introduction.....	26
8.1.2	Mooring analysis conditions.....	26
8.2	Floating structure offset.....	27
8.2.1	General.....	27
8.2.2	Mean offset.....	27
8.2.3	Extreme values of offset.....	27
8.3	Floating structure response.....	28
8.3.1	Analysis methods.....	28
8.3.2	Extreme value statistics.....	29
8.3.3	Low-frequency damping.....	30
8.3.4	Riser considerations.....	30
8.4	Mooring line response.....	30
8.4.1	General.....	30
8.4.2	Quasi-static analysis.....	30
8.4.3	Dynamic analysis.....	31
8.5	Line tension.....	31
8.5.1	Mean tension.....	31
8.5.2	Extreme values of tension.....	31
8.5.3	Design checks.....	31
8.5.4	Tension for fatigue analysis.....	31
8.6	Line length and geometry constraints.....	32
8.7	Anchor forces.....	32
8.8	Typical mooring configuration analysis and assessment.....	32
8.8.1	Frequency-domain analysis for spread mooring systems.....	32
8.8.2	Frequency-domain analysis for single point mooring systems.....	32
8.8.3	Time-domain analysis.....	33
8.9	Thruster-assisted moorings.....	33
8.9.1	General.....	33
8.9.2	Analysis conditions.....	33
8.9.3	Determination of allowable thrust.....	33
8.9.4	Load sharing.....	34
8.10	Transient analysis of floating structure motions.....	34
8.10.1	General.....	34
8.10.2	Combined time and frequency-domain analyses.....	35
8.10.3	Time-domain analysis.....	35
9	Fatigue analysis.....	35
9.1	Basic considerations.....	35
9.2	Fatigue resistance.....	36
9.2.1	Wire rope, chain and connecting links.....	36
9.2.2	T-N curves.....	36
9.2.3	Tension-tension (T-T) fatigue.....	37
9.2.4	Bending-tension (B-T) and free bending fatigue.....	37
9.3	Fatigue analysis procedure.....	38
9.3.1	General.....	38
9.3.2	Cumulative fatigue damage.....	38
9.3.3	Fatigue damage assessment.....	39
10	Design criteria.....	43
10.1	Floating structure offset.....	43
10.2	Line tension limit.....	43
10.3	Grounded line length.....	43
10.4	Anchoring systems.....	44

10.4.1 General44
10.4.2 Drag anchors44
10.4.3 Anchor piles44
10.4.4 Other anchor types.....45
10.4.5 Chain and wire rope holding capacity.....45

	Page
10.4.6 Mooring test load	45
10.5 Fatigue safety factor	46
10.6 Corrosion and wear	46
10.7 Clearances	47
10.7.1 Basic considerations	47
10.7.2 Mooring line crossing pipeline	47
10.7.3 Horizontal distance between installations	47
10.7.4 Clearance between a drag anchor and other installations	47
10.8 Supporting structures	47
11 Mooring hardware	47
11.1 Mooring line components	47
11.1.1 General	47
11.1.2 Wire rope	47
11.1.3 Chain	48
11.1.4 Connecting links	48
11.1.5 Spring buoys	48
11.2 Winching equipment	48
11.3 Monitoring equipment	48
11.3.1 Line tension	48
11.3.2 Line payout	48
11.3.3 Floating structure position	49
11.3.4 Floating structure heading	49
12 In-service inspection, monitoring and maintenance	49
12.1 General	49
12.2 Mobile moorings	49
12.3 Permanent moorings	49
12.3.1 General	49
12.3.2 Structural integrity management system philosophies	50
13 Dynamic positioning system	51
13.1 Basic considerations	51
13.1.1 General	51
13.1.2 DP equipment	51
13.2 Design and analysis	52
13.2.1 Failure modes and effects analysis	52
13.2.2 DP equipment classes	52
13.3 Design, test and maintenance	53
13.4 Operating personnel	53
13.5 Determination of stationkeeping capability	53
14 Synthetic fibre rope mooring	53
14.1 Basic considerations	53
14.2 Fibre rope mooring analysis	54
14.2.1 Fibre rope axial stiffness	54
14.2.2 Fibre rope line length	54
14.3 Fatigue analysis	54
14.3.1 Tension-tension fatigue resistance	54
14.3.2 Axial compression fatigue	54
14.4 Creep analysis	54
14.5 Design criteria	55
14.5.1 Maximum line tension	55
14.5.2 Minimum line tension	55
14.5.3 Fatigue	55
14.5.4 Creep elongation	55
14.6 Model testing	56
Annex A (informative) Additional information and guidance	57
A.1 Scope	57
A.1.1 General	57
A.1.2 Spread moorings (catenary, taut-line and semi-taut-line)	57

	Page	
A.1.3	Single point moorings.....	58
A.1.4	Dynamic positioning (DP) systems	59
A.1.5	Thruster-assisted moorings.....	59
A.1.6	Permanent and mobile stationkeeping systems.....	59
A.1.7	Moorings line components.....	59
A.2	Normative references.....	66
A.3	Terms and definitions.....	67
A.4	Symbols and abbreviated terms.....	67
A.5	Overall considerations.....	67
A.5.1	Functional requirements	67
A.5.2	Safety requirements.....	67
A.5.3	Planning requirements.....	69
A.5.4	Inspection and maintenance requirements.....	69
A.5.5	Analytical tools.....	69
A.6	Design requirements.....	69
A.6.1	Exposure levels	69
A.6.2	Limit states.....	70
A.6.3	Defining design situations	70
A.6.4	Design situations.....	70
A.7	Actions	71
A.7.1	General	71
A.7.2	Site-specific data requirements.....	72
A.7.3	Environmental actions on mooring lines.....	73
A.7.4	Indirect actions.....	74
A.8	Moorings analysis	75
A.8.1	Basic considerations	75
A.8.2	Floating structure offset.....	75
A.8.3	Floating structure response.....	75
A.8.4	Moorings line response.....	77
A.8.5	Line tension	78
A.8.6	Line length and geometry constraints	78
A.8.7	Anchor forces	79
A.8.8	Typical mooring configuration analysis and assessment.....	79
A.8.9	Thruster-assisted moorings.....	81
A.8.10	Transient analysis of floating structure motions.....	88
A.9	Fatigue analysis.....	88
A.9.1	Basic considerations	88
A.9.2	Fatigue resistance.....	90
A.9.3	Fatigue analysis procedure.....	92
A.10	Design criteria.....	94
A.10.1	Floating structure offset	94
A.10.2	Line tension limit.....	95
A.10.3	Grounded line length	95
A.10.4	Anchoring systems	95
A.10.5	Fatigue safety factor	102
A.10.6	Corrosion and wear.....	103
A.10.7	Clearances	103
A.10.8	Supporting structures.....	103
A.11	Moorings hardware	103
A.11.1	Moorings line components.....	103
A.11.2	Winching equipment	106
A.11.3	Monitoring equipment.....	108
A.12	In-service inspection, monitoring and maintenance	108
A.12.1	General	108
A.12.2	Mobile moorings.....	108
A.12.3	Permanent moorings.....	108
A.13	Dynamic positioning system.....	110
A.13.1	Basic considerations	110
A.13.2	Design and analysis.....	110

	Page
A.13.3 Design, test and maintenance	111
A.13.4 Operating personnel.....	112
A.13.5 Determination of stationkeeping capability	112
A.14 Synthetic fibre rope mooring.....	112
A.14.1 Basic considerations.....	112
A.14.2 Fibre rope mooring analysis.....	113
A.14.3 Fatigue analysis	114
A.14.4 Creep analysis.....	114
A.14.5 Design criteria	116
A.14.6 Model testing.....	116
Annex B (informative) Regional information	117
B.1 Introduction	117
B.1.1 General comments to the regional information.....	117
B.1.2 Specific comments to the regional information	117
B.2 Offshore Norway	117
B.2.1 Description of region.....	117
B.2.2 Regulatory framework.....	117
B.2.3 Technical information	117
B.2.4 Technical commentary	120
B.2.5 Additional national requirements.....	120
Bibliography.....	121
