

ISO 15136-2:2006-06 (E)

Petroleum and natural gas industries - Progressing cavity pump systems for artificial lift - Part 2: Surface-drive systems

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Abbreviated terms	5
5	Functional specification	6
5.1	General	6
5.2	Surface-drive system type selection	6
5.3	Functional characteristics	6
5.4	Environmental compatibility	7
5.5	Compatibility with related well equipment	7
5.6	Design validation and product functional testing	7
5.7	Quality control documentation	7
6	Technical specification	8
6.1	General requirements	8
6.2	Technical characteristics	8
6.3	Design criteria	8
6.4	Design verification	10
6.5	Design validation	10
6.6	Product functional test	10
6.7	Additional testing	11
6.8	Allowable design changes	11
6.9	Design scaling	11
7	Supplier requirements	11
7.1	General	11
7.2	Documentation and data control	11
7.3	Product identification	13
7.4	Quality control documentation	13
7.5	Design verification	17
7.6	Product functional testing	17
8	Repair	17
9	Preparation for shipment	17
10	Product application changes	17
Annex A (normative) Requirements for elastomers and non-metallic materials		18
Annex B (informative) Brake system evaluation method		20
Annex C (informative) Installation guidelines		34

Annex D (informative) Operation guidelines	36
Annex E (informative) Equipment selection guidelines	38
Annex F (informative) User/purchaser functional specification form	39
Annex G (informative) Brake system test methods	41
Annex H (informative) Selection and use of sucker rods in PCP rotary pumping applications	44
Bibliography	49
