

# ISO 23251:2006-08 (E)

## Petroleum, petrochemical and natural gas industries - Pressure-relieving and depressuring systems

---

| Contents   | Page |
|--|------|
| Foreword .....   | v    |
| Introduction .....   | vi   |
| 1 Scope .....  | 1    |
| 2 Normative references .....   | 1    |
| 3 Terms and definitions .....  | 1    |
| 4 Causes of overpressure .....   | 10   |
| 4.1 General .....  | 10   |
| 4.2 Overpressure protection philosophy .....                               | 10   |
| 4.3 Potentials for overpressure .....                                      | 11   |
| 4.4 Recommended minimum relief system design content .....                 | 17   |
| 4.5 List of items required in flare-header calculation documentation ..... | 20   |
| 4.6 Guidance on vacuum relief .....  | 20   |
| 5 Determination of individual relieving rates .....                        | 22   |
| 5.1 Principal sources of overpressure .....                                | 22   |
| 5.2 Sources of overpressure .....  | 24   |
| 5.3 Effects of pressure, temperature, and composition .....                | 24   |
| 5.4 Effect of operator response .....                                      | 24   |
| 5.5 Closed outlets .....   | 24   |
| 5.6 Cooling or reflux failure .....  | 25   |
| 5.7 Absorbent flow failure .....   | 26   |
| 5.8 Accumulation of non-condensables .....                                 | 26   |
| 5.9 Entrance of volatile material into the system .....                    | 26   |
| 5.10 Failure of process stream automatic controls .....                    | 27   |
| 5.11 Abnormal process heat input .....                                     | 29   |
| 5.12 Internal explosion (excluding detonation) .....                       | 30   |
| 5.13 Chemical reaction .....   | 30   |
| 5.14 Hydraulic expansion .....   | 31   |
| 5.15 External pool fires .....   | 36   |
| 5.16 Jet fires .....   | 51   |
| 5.17 Opening manual valves .....   | 51   |
| 5.18 Electric power failure .....  | 51   |
| 5.19 Heat-transfer equipment failure .....                                 | 52   |
| 5.20 Vapour depressuring .....   | 55   |
| 5.21 Special considerations for individual pressure-relief devices .....   | 63   |
| 5.22 Dynamic simulation .....  | 64   |
| 6 Selection of disposal systems .....                                      | 65   |
| 6.1 General .....  | 65   |
| 6.2 Fluid properties that influence design .....                           | 65   |
| 6.3 Atmospheric discharge .....  | 66   |
| 6.4 Disposal by flaring .....  | 76   |
| 6.5 Disposal to a lower-pressure system .....                              | 95   |
| 6.6 Disposal of liquids and condensable vapours .....                      | 96   |
| 7 Disposal systems .....   | 97   |

|  |  |            |
|--|--|------------|
| 7.1  | Definition of system design load .....     | 97         |
| 7.2  | System arrangement .....                   | 100        |
| 7.3  | Design of disposal system components ..... | 102        |
| 7.4  | Flare gas recovery systems .....           | 137        |
| <b>Annex A (informative) Determination of fire relief requirements .....</b>             |  | <b>142</b> |
| <b>Annex B (informative) Special system design considerations .....</b>                  |  | <b>146</b> |
| <b>Annex C (informative) Sample calculations for sizing a subsonic flare stack .....</b> |  | <b>149</b> |
| <b>Annex D (informative) Typical details and sketches .....</b>                          |  | <b>166</b> |
| <b>Annex E (informative) High integrity protection systems (HIPS) .....</b>              |  | <b>169</b> |
| <b>Bibliography .....</b>  |  | <b>176</b> |
