

DIN EN ISO 19904-1:2007-02 (E)

Petroleum and natural gas industries - Floating offshore structures - Part 1:
Monohulls, semi-submersibles and spars (ISO 19904-1:2006); English version EN ISO
19904-1:2006

Inhalt	Seite
Foreword	5
Introduction.....	5
1 Scope.....	7
2 Normative references.....	8
3 Terms and definitions	8
4 Symbols and abbreviated terms	15
4.1 Symbols.....	15
4.2 Abbreviated terms	16
5 Overall considerations.....	18
5.1 Functional requirements	18
5.2 Safety requirements	18
5.3 Planning requirements.....	19
5.4 Rules and regulations.....	20
5.5 General requirements	20
5.6 Independent verification	24
5.7 Analytical tools	24
5.8 In-service inspection and maintenance	24
5.9 Assessment of existing floating structures	24
5.10 Reuse of existing floating structures	25
6 Basic design requirements	25
6.1 General	25
6.2 Exposure levels	25
6.3 Limit states.....	28
6.4 Design situations.....	29
7 Actions and action effects.....	31
7.1 General	31
7.2 Permanent actions (<i>G</i>)	31
7.3 Variable actions (<i>Q</i>).....	31
7.4 Accidental actions (<i>A</i>).....	31
7.5 Environmental actions (<i>E</i>)	33
7.6 Other actions	41
7.7 Repetitive actions.....	41
7.8 Action combinations	41
8 Global analysis	42
8.1 General	42
8.2 Static and mean response analyses.....	42
8.3 Global dynamic behaviour	43
8.4 Frequency domain analysis	45
8.5 Time domain analysis	45
8.6 Uncoupled analysis.....	45
8.7 Coupled analysis	46
8.8 Resonant excitation and response.....	46
8.9 Platform offset	46
8.10 Air gap	46
8.11 Platform motions and accelerations	46

8.12	Model tests	47
8.13	Design situations for structural analysis	48
9	Structural considerations	48
9.1	General.....	48
9.2	Representative values of actions.....	49
9.3	Design scantlings	50
9.4	Modelling	51
9.5	Structural analysis.....	53
9.6	Structural strength.....	55
9.7	Design checks.....	55
9.8	Special design issues	60
9.9	Material	61
9.10	Corrosion protection of steel	63
9.11	Fabrication and construction	63
9.12	Marine operations.....	64
9.13	Topsides/hull interface.....	64
10	Fatigue analysis and design.....	65
10.1	General.....	65
10.2	Fatigue damage design safety factors	66
10.3	Outline of approach	67
10.4	Environmental data	68
10.5	Structural modelling.....	68
10.6	Hydrostatic analyses.....	68
10.7	Response amplitude operators and combinations of actions.....	68
10.8	Stresses and SCFs	69
10.9	Stress range counting and distribution	69
10.10	Fatigue resistance	69
10.11	Damage accumulation.....	69
10.12	Fracture mechanics methods.....	70
10.13	Fatigue-sensitive components and connections	70
11	Monohulls	71
11.1	General.....	71
11.2	General design criteria.....	71
11.3	Structural strength.....	72
12	Semi-submersibles	75
12.1	General.....	75
12.2	General design criteria.....	75
12.3	Structural strength.....	76
13	Spars	76
13.1	General.....	76
13.2	General design requirements	77
13.3	Structural strength.....	78
14	Conversion and reuse	78
14.1	General.....	78
14.2	Minimum design, construction and maintenance standards.....	79
14.3	Pre-conversion structural survey	79
14.4	Effects of prior service.....	79
14.5	Corrosion protection and material suitability.....	80
14.6	Inspection and maintenance	81
15	Hydrostatic stability and compartmentation	81
15.1	General.....	81
15.2	Inclining test.....	82
15.3	Compartmentation	82
15.4	Watertight and weathertight appliances	82
15.5	Special requirements for monohulls	82
16	Mechanical systems	83
16.1	General.....	83
16.2	Hull systems.....	83

16.3	Import and export systems	90
16.4	Fire protection systems.....	93
17	Stationkeeping systems	94
17.1	General	94
17.2	Mooring equipment	94
17.3	Turret	95
18	In-service inspection, monitoring and maintenance	97
18.1	General	97
18.2	Structural integrity management system philosophies	97
18.3	Planning considerations.....	100
18.4	Implementation issues.....	101
18.5	Minimum requirements.....	104
Annex A	(informative) Additional information and guidance	109
A.1	Scope.....	109
A.2	Normative references.....	111
A.3	Terms and definitions	111
A.4	Symbols and abbreviated terms	111
A.5	Overall considerations.....	112
A.6	Basic design requirements	116
A.7	Actions and action effects.....	118
A.8	Global analysis	130
A.9	Structural considerations.....	133
A.10	Fatigue analysis and design	139
A.11	Monohulls.....	142
A.12	Semi-submersibles.....	146
A.13	Spars.....	147
A.14	Conversion and reuse.....	148
A.15	Hydrostatic stability and compartmentation	149
A.16	Mechanical systems.....	149
A.17	Stationkeeping systems	159
A.18	In-service inspection, monitoring and maintenance	160
	Bibliography.....	177
