DIN EN 16453:2014-06 (E)

Pulp, paper and paperboard - Determination of phthalates in extracts from paper and paperboard

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Principle 5
3.1 General 5
3.2 Interferences 5

4 Materials 5
4.1 General 5
4.2 Pasteur pipettes 6
4.3 Double mark glass pipette of 0,05 ml, 0,2 ml, 0,5 ml, 1 ml, 5 ml and 10 ml 6
4.4 Volumetric flasks of 5 ml, 10 ml, 50 ml and 100 ml 6
4.5 Screw-cap glass bottle PYREX of 250 ml with a Polytetrafluorethylene-septa cap 6
4.6 Graduated cylinder of 200 ml 6
4.7 Round flask of 50 ml and 250 ml 6
4.8 Glass funnel 6
4.9 Polytetrafluorethylene-screw-cap glass vial single use (capacity adapted to the volume of concentrate) 6

5 Apparatus 6
5.1 Balance: capable of accurately weighing 0,000 1 g 6
5.2 Round flask heater 6
5.3 Rotary vacuum evaporator 6
5.4 Gas chromatograph coupled to a mass spectrometer (GC-MS) 6

6 Reagents 6
6.1 General 6
6.2 Operating gases for gas chromatography/mass spectrometry, of high purity and in accordance with manufacturer's specifications 6
6.3 Ethyl acetate, C4H8O2, CAS N° 141-78-6 6
6.4 Isooctane, C8H18, CAS N° 540-84-1 6
6.5 Internal standard stock solution: For example d4-ring-deuterated-dibutyl phthalate (D4-ring-DBP) at 10 g/l 6
6.6 Stock solutions of individual phthalate at 1 000 mg/l in ethyl acetate 7

7 Sampling 7

8 Preparation of the test sample of water extract 8

9 Preparation of the test sample of the organic solvent extract 8

10 Preparation of the test sample of the MPPO Extract 8

11 Procedure 8
11.1 GC conditions 8
11.2 Calibration 9
11.3 Analysis of test samples 9

12 Expression of results 10
12.1 For organic solvent extract: Expression of results 10
12.2 For MPPO extract: Expression of results 10

13 Test report 10

14 Precision data 11

Annex A (informative) GC-MS total ion chromatogram of a standard calibration solution of 2 mg/l of phthalates 12
