

DIN 53120-1:2018-03 (E)

Testing of paper and board - Determination of air permeance - Part 1: Medium rate of air permeance according to Bendtsen

Contents	Page
Foreword	3
Introduction	4
1 Scope	5
2 Normative references	5
3 Terms and definitions.....	5
4 Principle.....	5
5 Test specimens.....	6
5.1 Sampling.....	6
5.2 Number.....	6
6 Conditioning of test specimens.....	6
7 Bendtsen apparatus	6
7.1 Test assembly	6
7.1.1 General	6
7.1.2 Pressure generator.....	7
7.1.3 Measuring pressure regulator and sensor.....	7
7.1.4 Central measuring unit for the air flow rate and the indication.....	8
7.1.5 Specimen clamping device	8
7.2 Checking and maintaining the apparatus.....	9
7.2.1 Leaktightness of test assembly	9
7.2.2 Checking the specimen clamping device	9
7.2.3 Checking the measuring pressure	9
7.2.4 Checking the air flow rate measuring apparatus.....	9
8 Procedure	9
9 Evaluation.....	10
10 Test report.....	10
Annex A (normative) Principle of mechanical apparatus with a variable area flow meter	11
A.1 Central unit.....	11
A.2 Flowmeter tubes.....	11
A.2.1 Movement of floats	11
A.2.2 Condition and cleaning of flowmeter tubes.....	12
A.3 Information on the test procedure	12
Bibliography.....	13
