## Analytical colorimetry - Part 2: Saunderson correction, solutions of the Kubelka-Munk equation, tinting strength, depth of shade and hiding power

---

Contents		Page
Foreword .....		iv
1 Scope .....	1	1
2 Normative references .....		1
3 Terms and definitions .....		1
4 Symbols and abbreviated terms .....		3
5 Saunderson correction .....		4
5.1 General .....		4
5.2 Incidence diffuse, observation 0° (d:0°) .....		5
5.3 Incidence 45°, observation 0° (45°:0°) .....		5
6 Solution of the Kubelka-Munk equations .....		5
6.1 General .....		5
6.2 Method 1 .....		6
6.3 Method 2 .....		6
7 Determination of relative tinting strength and residual colour difference of coloured pigments .....		7
7.1 General .....		7
7.2 Principle .....		7
7.3 Procedure .....		7
7.3.1 General .....		7
7.3.2 Evaluation of absorption at the absorption maximum .....		7
7.3.3 Evaluation of the weighted K/S sum .....		8
7.3.4 Evaluation by equalizing the tristimulus value, Y .....		9
7.3.5 Evaluation by equalizing the smallest of the tristimulus values X, Y, and Z .....		9
7.3.6 Evaluation by equalizing the depth of shade .....		10
8 Determination of hiding power of pigmented media .....		12
8.1 General .....		12
8.2 Example for white or light-coloured paints with a contrast ratio of 0,98 as hiding power criterion .....		12
9 Repeatability and reproducibility .....		13
Annex A (normative) Tables of coefficients for calculating a() values (standard illuminant D65 and 10° standard observer) .....		14
Annex B (normative) Tables of coefficients for calculating a() values (illuminant C and 2° standard observer) .....		16
Bibliography .....		18
