ISO 27065:2011-04 (E)

Protective clothing - Performance requirements for protective clothing worn by operators applying liquid pesticides

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Classification and testing requirements 3

5 Performance requirements of protective clothing materials 4
5.1 Preconditioning 4
5.2 Material penetration resistance 5
5.3 Material resistance to penetration by liquid under pressure 6
5.4 Material resistance to permeation 6
5.5 Material tensile strength 6
5.6 Material tear resistance 7

6 Performance requirements of seams 7
6.1 Preconditioning 7
6.2 Seam penetration resistance 7
6.3 Seam resistance to penetration by liquid under pressure 8
6.4 Seam resistance to permeation 8
6.5 Seam tensile strength 9

7 Performance requirements of garments 9
7.1 Preconditioning 9
7.2 Practical performance 9
7.3 Liquid penetration resistance 10
7.4 Ergonomics 10

8 Marking and information supplied by the manufacturer 10
8.1 General 10
8.2 Labelling 11
8.3 Instructions for use 11
8.4 Product technical information 12

Annex A (normative) Test subject exercises for practical performance evaluation 13

Annex B (informative) Material water-vapour resistance (optional) 14

Annex C (informative) Atomizer test 15

Annex D (informative) Additional testing requirements for Type 6 and Type 4 garments 16

Annex E (informative) Selection of test chemical for penetration tests 17

Bibliography 18
