

DIN EN ISO 20349-1:2017-12 (E)

Personal protective equipment - Footwear protecting against risks in foundries and welding - Part 1: Requirements and test methods for protection against risks in foundries (ISO 20349-1:2017)

Contents

	Page
European foreword.....	3
Annex ZA (informative) Relationship between this European Standard and the essential requirements of EU Directive 89/686/EEC Personal Protective Equipment aimed to be covered.....	4
Foreword.....	6
1 Scope.....	7
2 Normative references.....	7
3 Terms and definitions.....	7
4 Classification of footwear.....	8
5 Sampling and conditioning.....	8
6 Requirements.....	8
7 Specific requirements.....	10
7.1 Height of upper.....	10
7.2 Footwear design.....	10
7.3 Resistance to the effects of molten metal.....	11
7.4 Resistance of upper to contact heat transmission.....	11
7.5 Burning behaviour.....	11
7.6 Heat insulation of sole complex.....	11
7.7 Surface shrinkage of leather.....	11
7.8 Footwear removal time.....	13
7.9 Innocuousness.....	13
8 Marking.....	13
9 Information to be supplied by the manufacturer.....	14
9.1 General.....	14
9.2 Information regarding perforation resistant insert.....	15
9.3 Electrical properties.....	16
9.3.1 Antistatic footwear.....	16
9.3.2 Electrically insulating footwear.....	16
9.4 Insocks.....	16
Annex A (normative) Test method for the resistance of footwear to the effects of large quantities of molten metal.....	17
Bibliography.....	21
