Clothing and equipment for protection against heat - Test method for convective heat resistance using a hot air circulating oven

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Principle	2
5	Apparatus	3
6	Specimens	4
7	Calibration of test oven	5
7.1	Temperature and air velocity uniformity	5
7.2	Daily	5
8	Procedures	5
8.1	Procedure for flat textile or other sheet materials	5
8.2	Procedure for protective gloves	6
8.3	Procedure for protective footwear	6
8.4	Procedure for protective helmets and eye or face protection devices	7
8.5	Procedures for small items and accessories on clothing	7
9	Test report	8
Annex A (normative) Temperature uniformity and time constant of hot air circulating oven		9
