Clothing and equipment for protection against heat - Test method for convective heat resistance using a hot air circulating oven

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	2
5 Apparatus	3
6 Specimens	4
7 Calibration of test oven	5
7.1 Temperature and air velocity uniformity	5
7.2 Daily	5
8 Procedures	5
8.1 Procedure for flat textile or other sheet materials	5
8.2 Procedure for protective gloves	6
8.3 Procedure for protective footwear	6
8.4 Procedure for protective helmets and eye or face protection devices	7
8.5 Procedures for small items and accessories on clothing	7
9 Test report	8
Annex A (normative) Temperature uniformity and time constant of hot air circulating oven	9
Bibliography	10
