ISO 27065:2017-09 (E)

Protective clothing - Performance requirements for protective clothing worn by operators applying pesticides and for re-entry workers

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 2

4 Classificationandtestingrequirements 3

5 Pre-treatment and conditioning 5
5.1 Pre-treatment by cleaning 5
5.2 Conditioning 5

6 Performance requirements of protective clothing materials 5
6.1 General 5
6.2 Material resistance to penetration (pipette test) 6
6.3 Material Repellency (pipette test) 6
6.4 Material resistance to permeation 7
6.5 Material tensile strength 7
6.6 Material tear resistance 7
6.7 Material puncture resistance 8

7 Performance requirements of seams 8
7.1 General 8
7.2 Seam resistance to penetration 8
7.3 Seam resistance to permeation 8
7.4 Seam tensile strength 9

8 Performance requirements of protective clothing 9
8.1 General 9
8.2 Ergonomic tests (practical performance) 9
8.3 Liquid penetration resistance 9
8.3.1 Low-level spray test 9
8.3.2 High-level spray test 10

9 Marking 10
9.1 General 10
9.2 Specific 10

10 Information supplied by the manufacturer 10

Annex A (normative) Test subject exercises for practical performance evaluation 12

Annex B (normative) Testing requirements for Levels C1, C2 and C3 protective clothing 13

Annex C (informative) Selection of test chemical for penetration tests 14

Annex D (informative) Material water-vapour resistance (optional) 15

Annex E (informative) Food and Agricultural Organization (FAO) Pesticide Labelling Pictograms16
Annex F (informative) Risk assessment -- PPE to mitigate risk 17

Bibliography 18
