ISO 15384:2018 (E)

Protective clothing for firefighters — Laboratory test methods and performance requirements for wildland firefighting clothing

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Clothing design

- 4.1 General
- 4.2 Collar
- 4.3 Protective coverall or protective suit
- 4.4 Pockets
- 4.5 Hardware
- 4.6 Retroreflective and/or fluorescent materials
- 4.7 Sleeves
- 4.8 Trousers

5 Sampling and pre-treatment

- 5.1 General
- 5.2 Sampling
- 5.3 Pre-treatment by cleaning
- 5.4 Conditioning
- 5.5 Exposure surface
- 5.6 Ageing

6 Thermal requirements

- 6.1 Flamespread
- 6.1.1 General
- 6.1.2 Face ignition
- 6.1.3 Edge ignition
- 6.2 Heat transfer (radiation)
- 6.3 Heat resistance
- 6.3.1 Heat resistance of the sewing thread
- 6.3.2 Heat resistance of retroreflective/fluorescent materials

7 Mechanical requirements

- 7.1 Tensile strength
- 7.2 Tear strength
- 7.3 Main seam strength

8 Ergonomic and comfort requirements

- 8.1 Thermal resistance
- 8.2 Water vapour resistance

9 General

- 9.1 Dimensional change after washing and/or dry-cleaning
- 9.2 Retroreflective and/or fluorescent performance
- 9.3 Summary of performance requirements

10 Marking and labelling

10.1 General
10.2 Label durability and legibility
10.3 Compliance marking requirements

11 Information supplied by the manufacturer

Annex A (normative) Uncertainty of measurement and determination of property values for the rating and classification
