DIN EN 12841:2024-04 (E)

Personal fall protection equipment - Rope access systems - Rope adjustment devices

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Requirements 9
4.1 General requirements for all Types 9
4.1.1 Anchor lines 9
4.1.2 Compatibility 9
4.1.3 Edge design 9
4.1.4 Corrosion resistance 9
4.1.5 Marking and information 9
4.2 Overview of the specific requirements for each type of rope adjustment devices 9
4.3 Specific requirements for Type A rope adjustment devices 10
4.3.1 Connecting elements 10
4.3.2 Free movement 10
4.3.3 Static strength 11
4.3.4 Dynamic performance 11
4.3.5 Dynamic strength and residual strength 11
4.4 Specific requirements for Type B rope adjustment devices 11
4.4.1 Free movement 11
4.4.2 Release prevention function 11
4.4.3 Minimum working performance 11
4.4.4 Dynamic strength and residual strength 12
4.5 Specific requirements for Type C rope adjustment devices 12
4.5.1 Hands-free locking element 12
4.5.2 Minimum working performance 12
4.5.3 Static strength 12
4.5.4 Dynamic strength and residual strength 12
4.5.5 Descent velocity and panic locking 12
4.5.6 Temperature rise 13

5 Test methods 13
5.1 Test apparatus 13
5.2 Conditioning and setup before testing 13
5.2.1 General conditioning 13
5.2.2 Conditioning to heat 13
5.2.3 Conditioning to wet 13
5.2.4 Conditioning to very cold 14
5.2.5 Conditioning to wet and cold 14
5.3 General tests 14
5.3.1 Test samples 14
5.3.2 Compatibility 14
5.3.3 Edge design 14
5.3.4 Corrosion resistance 15
5.4 Specific tests 15

5.4.1 Length of connecting elements 15
5.4.2 Movement test 15
5.4.3 Release prevention test for Type B rope adjustment devices 16
5.5 Static tests 17
5.5.1 Test samples 17
5.5.2 Minimum working performance test for Type B and Type C rope adjustment devices 17
5.5.3 Static strength test for Type A and Type C rope adjustment devices 18
5.6 Dynamic tests 19
5.6.1 Test samples 19
5.6.2 Dynamic performance for Type A rope adjustment devices 19
5.6.3 Dynamic strength and residual strength for Type A rope adjustment devices 20
5.6.4 Dynamic strength and residual strength for Type B and Type C rope adjustment devices 22
5.7 Descent test for Type C rope adjustment devices 25
5.7.1 General 25
5.7.2 Test samples 26
5.7.3 Test arrangement 26
5.7.4 Velocity, locking and temperature rise 26

6 Marking 27

7 Manufacturer's instructions and information 28

Annex A (informative) List of useful information 29

A.1 General 29
A.2 Maintenance of rope adjustment devices within the user's reach 29
A.3 Anticipation of emergency situations 29
A.4 Care when selecting anchor lines 29

Annex B (informative) Background and rationale about the changes between this Annex ZA (informative) Relationship between this European Standard and the essential requirements of Regulation 2016/425 aimed to be covered 38
