# ISO 22608:2004-07 (E)

## Protective clothing - Protection against liquid chemicals - Measurement of repellency, rete ntion, and penetration of liquid pesticide formulations through protective clothing materials

## Contents

Page

Foreword ..... iv

Introduction ..... v

1 Scope ..... 1

2 Normative references ..... 1

3 Terms and definitions ..... 1

4 Principle ..... 2

5 Apparatus ..... 3
5.1 Apparatus and materials for contamination of test specimen ..... 3
5.2 Apparatus for analysis using Method A ..... 3
5.3 Apparatus and materials for analysis using Method B ..... 3

6 Test specimens ..... 6

7 Selection of analytical technique ..... 7

8 Preparation of test apparatus and materials ..... 7
8.1 Calibration of the pipettor ..... 7
8.2 Preparation of test assembly ..... 7
8.3 Conditioning of test specimen ..... 8
8.4 Testing temperature ..... 8

9 Method A ..... 8
9.1 Contamination of test specimen ..... 8
9.2 Calculation ..... 8

10 Method B ..... 9
10.1 Verification of amount of active ingredient in test liquid applied ..... 9
10.2 Determination of extraction efficiency ..... 9
10.3 Testing of blanks ..... 9
10.4 Contamination of test specimen ..... 10
10.5 Extraction of test liquids ..... 10
10.6 Calculation ..... 10

11 Precision and bias ..... 11

12 Test report ..... 11
