Statistical methods in process management - Capability and performance - Part 7: Capability of measurement processes

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Symbols and abbreviated terms	6
4.1	Symbols	6
4.2	Abbreviated terms	8
5	Basic principles	9
5.1	General	9
5.2	Resolution	11
5.3	MPE known and used	11
5.4	Capability and performance limits for measuring system and measurement process	11
6	Implementation	11
6.1	General	11
6.2	Factors that influence the measurement process	11
7	Studies for calculating the uncertainty components	17
7.1	Measuring system	17
7.2	Uncertainty components of the measurement process	22
8	Calculation of combined uncertainty	22
8.1	General	22
8.2	Calculation of expanded uncertainty	24
9	Capability	24
9.1	Performance ratios	24
9.2	Capability indices	25
10	Capability of the measurement process compared to the capability of the production process	25
10.1	Relation between observed process capability and measurement capability ratio	25
10.2	Relation between observed process capability and measurement capability	27
11	Ongoing review of the measurement process stability	27
11.1	Ongoing review of the stability	27
11.2	Monitoring linearity	28
12	Capability of attribute measurement processes	29
12.1	General	29
12.2	Capability calculations without using reference values	29
12.3	Capability calculations using reference values	30
12.4	Ongoing review	34

Annex A (informative) Examples	35
Annex B (informative) Statistical methods used	41
Bibliography	46
