

ISO 22514-8:2014-06 (E)

Statistical methods in process management - Capability and performance - Part 8: Machine performance of a multi-state production process

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	2
3	Terms and definitions	2
4	Symbols and abbreviations	5
5	Preliminary technical analysis of the process	6
5.1	General	6
5.2	Identification of intrinsic factors	6
5.3	Determination of process-specific states	7
6	Preliminary verifications before calculating the machine performance indices	7
6.1	Measurement system	7
6.2	Definition of the sampling plan for estimating global intrinsic dispersion	8
7	Estimation of global intrinsic dispersion and calculation of machine performance indices	
	7.1 General	8
7.2	Verification on the absence of outliers in the set of made measurement results	9
7.3	Determination of the widths of local intrinsic dispersions	10
7.4	Determination of the locations of local intrinsic dispersions	11
7.5	Global intrinsic dispersion: type and estimation	12
7.6	Calculation of capability indices P_m and P_{mk}	14
7.7	Acceptance thresholds for the machine performance indices	15
	Annex A (informative) States qualifying a processing process	16
	Annex B (normative) Statistical tests	32
	Bibliography	37
