## Statistical methods for implementation of Six Sigma — Selected illustration of analysis of variance

---

### Contents

|         |  |
|---------|--|
|         | Foreword   |
|         | Introduction   |
| 1       | Scope  |
| 2       | Normative references   |
| 3       | Terms and definitions  |
| 4       | Symbols and abbreviated terms                                  |
| 5       | General description of one-way and two-way classifications     |
| 5.1     | General  |
| 5.2     | Stating objectives   |
| 5.3     | Data collection plan   |
| 5.4     | Variables description  |
| 5.5     | Measurement system considerations                              |
| 5.6     | Performing data collection                                     |
| 5.7     | Verification of ANOVA assumptions                              |
| 5.7.1   | General  |
| 5.7.2   | Test of normality  |
| 5.7.3   | Test of homogeneity of variance                                |
| 5.7.4   | Test of independence   |
| 5.7.5   | Outliers identification  |
| 5.7.6   | How to deal with non-standard cases                            |
| 5.8     | Undertaking ANOVA analysis                                     |
| 5.8.1   | State hypotheses H0 and H1                                     |
| 5.8.2   | Graphical analysis   |
| 5.8.3   | Generate analysis results                                      |
| 5.8.4   | Residual analysis  |
| 5.9     | Further analysis   |
| 5.10    | Conclusion   |
| 6       | Description of Annexes A through E                             |
| Annex A | (informative) Bond strength                                    |
| A.1     | Stating objectives   |
| A.2     | Data collection plan   |
| A.3     | Variables description  |
| A.4     | Measurement system considerations                              |
| A.5     | Performing data collection                                     |
| A.6     | Verification of ANOVA assumptions                              |
| A.6.1   | General  |
| A.6.2   | Test of independence   |
| A.6.3   | Test of normality  |
| A.6.4   | Test for homogeneity of variance                               |
| A.7     | Undertaking ANOVA analysis                                     |
| A.8     | Further analysis   |
| A.9     | Conclusion   |
| Annex B | (informative) Effect of script and training on income per sale |
| B.1     | Stating objectives   |

- B.2 Data collection plan
- B.3 Variables description
- B.4 Measurement system considerations
- B.5 Performing data collection
- B.6 Verification of ANOVA assumptions
  - B.6.1 General
  - B.6.2 Test of independence
  - B.6.3 Test of normality
  - B.6.4 Test for homogeneity of variance
- B.7 Undertaking ANOVA analysis
- B.8 Further analysis
- B.9 Conclusion

**Annex C (informative) Strength of welded joint**

- C.1 Stating objectives
- C.2 Data collection plan
- C.3 Variables description
- C.4 Measurement system considerations
- C.5 Performing data collection
- C.6 Verification of ANOVA assumptions
  - C.6.1 General
  - C.6.2 Test of independence
  - C.6.3 Test of normality
  - C.6.4 Test for homogeneity of variance
- C.7 Undertaking ANOVA analysis
- C.8 Further analysis
- C.9 Conclusion

**Annex D (informative) Water consumption in a petroleum enterprise**

- D.1 Stating objectives
- D.2 Data collection plan
- D.3 Variables description
- D.4 Measurement system considerations
- D.5 Performing data collection
- D.6 Verification of ANOVA assumptions
  - D.6.1 Test of independence
  - D.6.2 Test of normality
  - D.6.3 Test for homogeneity of variance
- D.7 Undertaking ANOVA analysis
- D.8 Further analysis
- D.9 Conclusion

**Annex E (informative) The hub total hours used on a task**

- E.1 Stating objectives
- E.2 Data collection plan
- E.3 Variables description
- E.4 Measurement system considerations
- E.5 Performing data collection
- E.6 Verification of ANOVA assumptions
  - E.6.1 General
  - E.6.2 Test of independence
  - E.6.3 Test of normality
  - E.6.4 Test for homogeneity of variance
- E.7 Undertaking ANOVA analysis
- E.8 Further analysis
- E.9 Conclusion

**Annex F (informative) ANOVA formulae**

- F.1 Methodology of one-way ANOVA
- F.2 Methodology of two-way ANOVA
  - F.2.1 General
  - F.2.2 Two-way crossed classification methodology for balanced data with interaction
  - F.2.3 Two-way crossed classifications methodology for balanced data without interaction
