ISO 11843-2:2000-05 (E)

Capability of detection - Part 2: Methodology in the linear calibration case

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Experimental design 2
4.1 General 2
4.2 Choice of reference states 2
4.3 Choice of the number of reference states, I, and the (numbers of) replications of procedure, J, K and L 3

5 The critical values yc and xc and the minimum detectable value xd of a measurement series 3
5.1 Basic assumptions 3
5.2 Case 1 -- Constant standard deviation 4
5.3 Case 2 -- Standard deviation linearly dependent on the net state variable 6

6 Minimum detectable value of the measurement method 9

7 Reporting and use of results 10
7.1 Critical values 10
7.2 Minimum detectable values 10

Annex A (normative) Symbols and abbreviations 11

Annex B (informative) Derivation of formulae 14

Annex C (informative) Examples 20
