

ISO 16337:2021 (E)

Application of statistical and related methods to new technology and product development process — Robust tolerance design (RTD)

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
4	Robust tolerance design
4.1	General
4.2	RTD experimentation
4.2.1	Data generation
4.2.2	Experimental design for data collection
4.2.3	Analysis of variance
4.3	Tolerance determination
4.3.1	Estimating total variance if tolerance is changed
4.3.2	Deciding tolerance
5	RTD case study (1) — Stabilizing a circuit by using theoretical formula
5.1	Experimentation
5.1.1	Objective
5.1.2	Experimental design for data collection and analysis of variance
5.2	Tolerance determination
6	RTD case study (2) — Stabilizing the piston by using a simulation experiment
6.1	Experimentation
6.1.1	Objective
6.1.2	Experimental design for data collection and analysis of variance
6.2	Tolerance determination
