

ISO 16355-1:2021 (E)

Application of statistical and related methods to new technology and product development process — Part 1: General principles and perspectives of quality function deployment (QFD)

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
4	Basic concepts of QFD
4.1	Theory and principles of QFD
4.2	QFD use of the word of function
4.3	Spirit of QFD
4.4	Display of information
5	Integration of QFD and product development methods
5.1	QFD support for product development methods
5.2	Flow of product development with QFD
5.2.1	Organization of the QFD flow
5.2.2	Flow chart of product development with QFD
6	Types of QFD projects
6.1	General
6.2	Applicable methods and tools
7	QFD team membership
7.1	QFD uses cross-functional teams
7.2	Core team membership
7.3	Subject matter experts
7.4	QFD team leadership
8	QFD voices
8.1	Voice of business
8.2	Voice of customer (VOC) or voice of stakeholder (VOS)
8.2.1	Definition of customer or stakeholder
8.2.2	Applicable methods and tools
8.2.3	Marketing perspective and engineering perspective
8.2.4	Applicable methods and tools
8.2.5	Prioritize customers or stakeholders
8.2.6	Applicable methods and tools
8.2.7	What is contained in the voice of customer (VOC) or voice of stakeholder (VOS)
8.2.8	Sources of VOC and VOS
8.2.9	Applicable methods and tools
8.2.10	Translating VOC/VOS into customer needs
8.2.11	Applicable methods and tools
9	Structuring information sets
9.1	General
9.2	Applicable tools and methods
10	Prioritization

- 10.1 General
 - 10.2 Applicable tools and methods
 - 11 Quantification
 - 11.1 General
 - 11.2 Applicable tools and methods
 - 12 Translation of one information set into another
 - 12.1 General
 - 12.2 Applicable tools and methods
 - 13 Transfer of prioritization and quantification from one information set into another
 - 13.1 Transfer of prioritization
 - 13.2 Applicable tools and methods
 - 13.3 Transfer of quantification
 - 13.4 Applicable tools and methods
 - 13.5 Transferring deployment sets by dimensions
 - 13.5.1 General
 - 13.5.2 Quality deployment
 - 13.5.3 Applicable tools and methods
 - 13.5.4 Technology deployment
 - 13.5.5 Applicable tools and methods
 - 13.5.6 Cost deployment
 - 13.5.7 Applicable tools and methods
 - 13.5.8 Reliability deployment
 - 13.5.9 Applicable tools and methods
 - 13.5.10 Safety deployment
 - 13.5.11 Security deployment (see ISO 16355-7)
 - 13.5.11.1 Organizational information
 - 13.5.11.2 Personal information
 - 13.5.11.3 Systems
 - 13.5.12 Lifestyle and emotional quality deployment
 - 13.5.13 Applicable tools and methods
 - 13.6 Transferring deployment sets by levels
 - 13.6.1 Function deployment
 - 13.6.2 Applicable tools and methods
 - 13.6.3 Parts deployment
 - 13.6.4 Applicable tools and methods
 - 13.6.5 Manufacturing and process deployments
 - 13.6.6 Applicable tools and methods
 - 13.6.7 Project work or task management
- 14 Solution concept engineering
 - 14.1 General
 - 14.2 Applicable tools and methods
- 15 Design optimization
 - 15.1 Parameter design for robustness
 - 15.2 Tolerance design
 - 15.3 Applicable tools and methods
- 16 Prototyping, testing, and validation
 - 16.1 General
 - 16.2 Applicable tools and methods
- 17 Build planning
 - 17.1 General
 - 17.2 Applicable tools and methods
- 18 Build start-up
 - 18.1 General
 - 18.2 Applicable tools and methods
- 19 Build

- 19.1 General
- 19.2 Applicable tools and methods
- 20 Packaging design, logistics, channel management, consumer information, and operating instructions
 - 20.1 General
 - 20.2 Applicable tools and methods
 - 20.3 Logistics
 - 20.4 Marketing claims
- 21 Customer support
 - 21.1 General
 - 21.2 Applicable tools and methods
- 22 Customer satisfaction
 - 22.1 General
 - 22.2 Applicable tools and methods
- 23 Product end-of-life disposal, recycle, reuse, and other sustainability concerns
 - 23.1 General
 - 23.2 Applicable tools and methods
- 24 Flow to next generation development
 - 24.1 General
 - 24.2 Applicable tools and methods

Annex A (informative) Examples of applicable methods and tools

- A.1 QFD Tools Matrix
- A.2 Project goals table
- A.3 Project goals prioritization with AHP
- A.4 Scope boundary analysis
- A.5 Process beginning/end table
- A.6 Customer segments table
- A.7 Project goals/Customer segments matrix
- A.8 Annotated customer process model
- A.9 Gemba visit table
- A.10 Customer voice table
- A.11 Affinity diagram of customer needs
- A.12 Hierarchy diagram of customer needs
- A.13 Customer needs prioritization with analytic hierarchy process
- A.14 Quality planning table (unweighted)
- A.15 Maximum value table
- A.16 Customer needs/functional requirements matrix (House of Quality) and other L-Matrices
- A.17 Design planning table
- A.18 Super Pugh concept selection with AHP
- A.19 Kansei engineering for emotional quality
- A.20 Reverse QFD
- A.21 New 7 management and planning tools
- A.22 Comprehensive QFD deployment flow diagram
- A.23 Modern blitz QFD® 3 Blitz QFD® is an example of a suitable product available commercially. This information is given for the convenience of users of this document and does not constitute an endorsement by ISO of this product. flow diagram
- A.24 German QFD institute best practice flow diagram
- A.25 Continuous QFD model

Annex B (informative) Concept relationships and their graphical representation
