Statistical interpretation of data - Part 6: Determination of statistical tolerance intervals

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms, definitions and symbols 1
3.1 Terms and definitions 1
3.2 Symbols 2

4 Procedures 3
4.1 Normal population with known variance and known mean 3
4.2 Normal population with known variance and unknown mean 3
4.3 Normal population with unknown variance and unknown mean 3
4.4 Any continuous distribution of unknown type 3

5 Examples 3
5.1 Data 3
5.2 Example 1: One-sided statistical tolerance interval under known variance 4
5.3 Example 2: Two-sided statistical tolerance interval under known variance 4
5.4 Example 3: One-sided statistical tolerance interval under unknown variance 5
5.5 Example 4: Two-sided statistical tolerance interval under unknown variance 6
5.6 Example 5: Distribution-free statistical tolerance interval for continuous distribution 6

Annex A (informative) Forms for tolerance intervals 8

Annex B (normative) One-sided statistical tolerance limit factors, k1(n; p; 1 -), for known 14

Annex C (normative) Two-sided statistical tolerance limit factors, k2(n; p; 1 -), for known 17

Annex D (normative) One-sided statistical tolerance limit factors, k3(n; p; 1 -), for unknown 20

Annex E (normative) Two-sided statistical tolerance limit factors, k4(n; p; 1 -), for unknown 23

Annex F (normative) One-sided distribution-free statistical tolerance intervals 26

Annex G (normative) Two-sided distribution-free statistical tolerance intervals 27

Annex H (informative) Construction of a distribution-free statistical tolerance interval for any type of distribution 28

Annex I (informative) Computation of factors for two-sided parametric statistical tolerance intervals 29
