ISO 13528:2005-09 (E)

Statistical methods for use in proficiency testing by interlaboratory comparisons

Contents

Page

Foreword v

0 Introduction vi
0.1 The aims of proficiency testing vi
0.2 ISO/IEC Guide 43 vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Statistical guidelines for the design and interpretation of proficiency tests 2
4.1 Action and warning signals 2
4.2 Guidelines for limiting the uncertainty of the assigned value 3
4.3 Guidelines for choosing the number of replicate measurements 3
4.4 Homogeneity and stability of samples 4
4.5 Operationally defined measurement methods 4
4.6 Reporting of data 5
4.7 Period of validity of the results of proficiency tests 5

5 Determination of the assigned value and its standard uncertainty 5
5.1 Choice of method of determining the assigned value 5
5.2 Formulation 5
5.3 Certified reference values 6
5.4 Reference values 7
5.5 Consensus values from expert laboratories 8
5.6 Consensus value from participants 9
5.7 Comparison of the assigned value 14
5.8 Missing values 14

6 Determining the standard deviation for proficiency assessment 15
6.1 Choice of method 15
6.2 Prescribed value 15
6.3 By perception 15
6.4 From a general model 17
6.5 From the results of a precision experiment 17
6.6 From data obtained in a round of a proficiency testing scheme 18
6.7 Comparison of precision values derived from a proficiency test with established values .18

7 Calculation of performance statistics 18
7.1 Estimates of laboratory bias 18
7.2 Percentage differences 22
7.3 Ranks and percentage ranks 24
7.4 z-scores 25
7.5 En numbers 27
7.6 z-scores 28
7.7 Zeta-scores () 29
7.8 Ez score 30
7.9 An example of the analysis of data when uncertainties are reported 30
7.10 Combined performance scores 35

8 Graphical methods for combining performance scores for several measurands from one round of a proficiency test 36
8.1 Application 36
8.2 Histograms of performance scores 36
8.3 Bar-plots of standardized laboratory biases 37
8.4 Bar-plots of standardized repeatability measurements 38
8.5 Youden Plot 38
8.6 Plots of repeatability standard deviations 45
8.7 Split samples 47

9 Graphical methods for combining performance scores over several rounds of a proficiency testing scheme 52
9.1 Applications 52
9.2 Shewhart control chart for z-scores 52
9.3 Cusum control chart for z-scores 55
9.4 Plots of standardized laboratory biases against laboratory averages 56
9.5 Dot plot 57

Annex A (normative) Symbols 59

Annex B (normative) Homogeneity and stability checks of samples 60

Annex C (normative) Robust analysis 64
