|-----------------------|----------------------------------|-------------|
| Foreword .....        |                                  | 3           |
| 1                     | Scope .....                      | 5           |
| 2                     | Normative references .....       | 5           |
| 3                     | Terms and definitions .....      | 5           |
| 4                     | Dimensions and designation ..... | 5           |
| 4.1                   | Dimensions .....                 | 5           |
| 4.2                   | Designation .....                | 6           |
| 5                     | Requirements .....               | 7           |
| 5.1                   | Material .....                   | 7           |
| 5.2                   | Heat treatment .....             | 7           |
| 5.3                   | Dimensions .....                 | 7           |
| 5.4                   | Length of chain strand .....     | 7           |
| 5.5                   | Working forces .....             | 8           |
| 5.6                   | Mechanical properties .....      | 8           |
| 6                     | Tests .....                      | 9           |
| 6.1                   | Material .....                   | 9           |
| 6.2                   | Manufacturing proof test .....   | 9           |
| 6.3                   | Final test .....                 | 9           |
| 6.4                   | Acceptance test .....            | 9           |
| 7                     | Surface condition .....          | 9           |
| 8                     | Marking .....                    | 9           |
| 9                     | Test certificate .....           | 9           |
| 10                    | Use .....                        | 10          |
| 11                    | Environmental aspects .....      | 10          |
| Annex A (informative) | Bases of calculation .....       | 11          |
