

# DIN EN 16222:2012-12 (E)

## Cathodic protection of ship hulls

---

<b>Contents</b>		<b>Page</b>
Foreword .....		4
Introduction .....		5
1	Scope .....	6
1.1	General .....	6
1.2	Structures .....	6
1.3	Materials .....	6
1.4	Environment .....	6
2	Normative references .....	6
3	Terms and definitions .....	7
4	Competence of personnel .....	7
5	Design basis .....	8
5.1	General .....	8
5.2	Cathodic protection criteria .....	8
5.3	Design process .....	9
5.4	Design parameters .....	10
5.5	Current demand .....	10
5.6	Cathodic protection systems .....	13
5.7	Electrical continuity .....	14
5.8	Fitting out period .....	14
6	Impressed current system .....	14
6.1	Objectives .....	14
6.2	Design considerations .....	14
6.3	Equipment considerations .....	15
7	Galvanic anodes system .....	19
7.1	Objectives .....	19
7.2	Design considerations .....	19
7.3	Anode materials .....	19
7.4	Factors determining the anode current output and operating life .....	20
7.5	Location of anodes .....	20
8	Commissioning, Operation and Maintenance .....	21
8.1	Objectives .....	21
8.2	Measurement Procedures .....	21
8.3	Commissioning: Galvanic Systems .....	21
8.4	Commissioning: Impressed Current Systems .....	22
8.5	Operation and maintenance .....	23
8.6	Dry-docking period .....	24
9	The protection of ships' hulls during fitting out and when laid up .....	25
9.1	Fitting out period .....	25
9.2	Lay up period .....	25
10	Documentation .....	25
10.1	Objectives .....	25

10.2	Impressed current system .....	26
10.3	Galvanic anode systems .....	26
Annex A (informative) Impressed current system for hulls of ships based on two cathodic protection zones .....		28
Annex B (informative) Guidance on design current values for cathodic protection of hulls of ships		29
B.1	Typical design current densities for the cathodic protection of bare steel (Jb) .....	29
B.2	Coating breakdown of conventional paint systems (fc) .....	29
B.3	Typical current densities for global approach of the cathodic protection of coated ships (Jg) .....	30
Annex C (informative) Anode resistance, current and life duration formulae .....		31
C.1	Anode resistance formulae .....	31
C.2	Calculation of the anode resistance at the end of life .....	32
C.3	Electrolyte resistivity .....	33
C.4	Galvanic anode current output .....	35
C.5	Anode life .....	35
C.6	Minimum Net Weight Requirement .....	35
Annex D (informative) Electrical bonding systems .....		37
Annex E (informative) Monitoring of electrical bonding of a ship's propeller .....		39
Annex F (informative) Impressed current system for ships based on an aft (stern) system only .....		40
Annex G (informative) Location of galvanic anodes in the stern area .....		41
Annex H (informative) Electrochemical characteristics of impressed current anodes .....		42
Annex I (informative) Cofferdam arrangements .....		43
Annex J (informative) Cathodic protection of a moored ship using suspended galvanic anodes .....		45
Bibliography .....		46
