

ISO 12215-9:2012-06 (E)

Small craft - Hull construction and scantlings - Part 9: Sailing craft appendages

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Symbols	3
5 Design stresses	4
6 Structural components to be assessed	6
7 Load cases	6
7.1 General	6
7.2 Load case 1 -- Fixed keel at 90° knockdown	7
7.3 Load case 2 -- Canted keel steady load at 30° heel with dynamic overload factor	8
7.4 Load case 3 -- Keelboat vertical pounding	9
7.5 Load case 4 -- Keelboat longitudinal impact	10
7.6 Load case 5 -- Centreboard on capsize recoverable dinghies	11
7.7 Load case 6 -- Centreboard or dagger board upwind	11
7.8 Other load cases	12
8 Computational methods	15
8.1 General	15
8.2 General guidance for assessment by 3D numerical procedures	15
8.3 Assessment by strength of materials/non-computational-based methods	16
9 Compliance	16
Annex A (normative) Application declaration	18
Annex B (informative) Information on metal for appendages and fasteners and "established practice" for fastening and welding	19
Annex C (informative) "Established practice" structural arrangement for ballast keels	30
Annex D (informative) "Established practice" calculation of keel fin strength (fixed or canting) and fixed ballast keel connected by bolts	44
Annex E (informative) Geometrical properties of some typical appendage foil shapes	61
Annex F (informative) Simplified fatigue strength assessment	64
Bibliography	76
