DIN 86210-2:2013-02 (E)

Replenishment with operating materials and disposal of fluid waste from seagoing vessels - Part 2: Emergency release couplings up to PN 10

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 5

4 Requirements 5
4.1 General 5
4.2 Emergency release coupling 5
4.2.1 General notes on the design of emergency release couplings 5
4.2.2 Force-controlled release 5
4.2.3 Displacement-controlled release 5
4.3 Pressure and temperature requirements 6
4.4 Resistance of coupling materials to the conveyed media 6

5 Applications 6
5.1 General 6
5.2 Principle of shoreside/barge-side connection 6
5.3 Location of the emergency release coupling 9

6 Emergency release couplings 9
6.1 Characteristics and design 9
6.2 Applications 9
6.3 Interface 9

7 Materials 10

8 Marking 10

Bibliography 11

Figures Figure 1 -- Connection by means of a hose assembly and hinged/swivelling pipe 7

Figure 2 -- Connection by means of a hose assembly and crane 8
